

- 1 Turn on** – tap the power button
- 2 Fan speed** – tap the fan button until it's on auto or high
- 3 Timer** – for ease of use press the timer button to select the number of hours you want the purifier to operate. It will automatically turn off after the set number of hours. Press and hold the same button for 3 seconds to cancel timer.
- 4 Child lock** – press and hold the air quality button for three seconds to turn on the child lock. This will disable all buttons. Press and hold the same button for 3 seconds to unlock. The device will beep when unlocked.

Operate air purifiers on the high setting as much as possible.

You should run the purifier while you are using the room and ideally two hours before and after the room is occupied.

Do not run air purifiers overnight as this can trigger school alarm systems.

For more information, review the Ventilation and Air Purification resources on the Policy Advisory Library.
