

# Highlights of 4D in 2025

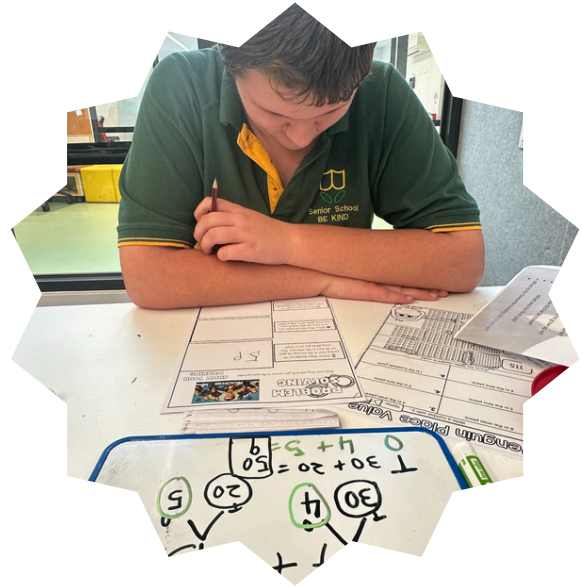

And in what seems like a blink of an eye, 2025 in 4D is done! And what a year it has been! From working in the café, to learning badminton from a pro and creating life size objects for book week, everyone has worked incredibly hard and moved from strength to strength.

A large focus for us in class was exploring equity and equality and learning how to advocate for our own needs while acknowledging and respecting the different needs of others. Our class posters are still visible around the learning places!

# Highlights of 4D in 2025

As we look to 2026, and think about the changes and opportunities to come, all of our students should be immensely proud of themselves and their growth this year. You are all capable and kind young people who have such important contributions to make to the world!
