## E safety for all ages

Presentation by the North Shore Police Crime Prevention Officer

As our lives become more and more sophisticated and technology improves, so do the threats from scams, security breaches and online threats. Are you concerned about keeping your family and yourself safe? Find out everything you need to know about protecting yourself and your loved ones from crime.

An opportunity to hear about important and relevant issues or projects. Held up to ten times a year on the fourth Monday of each month, each seminar will feature topics presented by an expert from Council, state government or other agency. You'll be invited to ask questions at the end.

If you miss the presentation, you can download the video and watch it later.
