

## Setting Up Wireless Connectivity on a Device.

The Illustration's in this procedure are on an Android Device but the steps are simular on any device.

1. Open settings and go to wireless or connections and turn on wireless.

 On Android devices select 'don't validate' (if you have validate selected you will not be able to save settings) Select Save  Choose either WIRELESS-5 or WIRELESS-2-4 (wireless-5 is faster, wireless 2-4 has more range.)

Select the preferred wireless network.

	ON	0
Connections WHFI, Bluesom, Data usage, Flight mode	UN	
	WIRELESS-2.4	
Sounds, Do not disturb	WIRELESS-5	/
Notifications Block, allow, prioritise	+ Add network	
Display Brightness, Home screen		
Wallpaper Wallpaper		
Advanced features		

 Enter your school logon into the username/identity field and enter your password for your school logon into the password field (User Name/Identity: joe.smith

Password: Xxxxxxx1 and Save.

6. Then turn it on again.

5. Sometimes it will not connect the first time. Turn the wireless off
