

WELCOME TO YEAR 6, 2026!

As we move through this first term, our Year 6 students are embracing their final year of primary school with enthusiasm. Students are actively involved in a range of learning opportunities, including student leadership and 5/6 sport where they are developing collaboration, confidence, and student voice. We have also come together to celebrate important events such as Harmony Week and Neurodiversity Week, recognising the value of inclusion, respect, and understanding within our diverse community. It is shaping up to be a memorable year for us all.

WRITING - HARMONY WEEK

Building on their Reading learning, students worked collaboratively to create impactful presentations aimed at educating other classes about racism and its effects on students. They applied their learning by developing their ideas to enhance audience engagement and understanding, using detailed explanations, examples, and research to strengthen their message. Students also integrated a range of multimodal elements to effectively enhance meaning and impact for their audience. Through this process, the presentations fostered empathy and empowered students to take a stand for respect and inclusion within our school community.

CONCEPT

This term, Year 6 students have been learning about Australia's system of government and the responsibilities of each level of government. Students participated in an engaging role play, taking a Bill through the House of Representatives, which helped them understand the process of debating and passing legislation. Students also explored the concept of preferential voting and applied this knowledge in a real-world context by using it during our Junior School Council elections. Through these experiences, students developed a deeper understanding of democracy and the importance of active citizenship.
