

APERTURE AND SHUTTER SPEED ASSIGNMENT

Read through the following:

<http://www.canonoutsideofauto.ca/learn/>

Play around with the following virtual camera for 5mins.

<http://www.canonoutsideofauto.ca/play/>

Take the “Challenge” mode:

<http://www.canonoutsideofauto.ca/challenge/>

Finally, your assignment. For each one, ensure you write what the settings were. Copy and paste the images you come up with on this document. try to get:

Blur the foreground and background around the plane

Get all objects in focus (long depth of field)

The propeller as a blur and a shallow depth of field

The propeller staying still with a long depth of field

An overexposed shot

An underexposed shot

A shot that has the ISO right down, but isn't underexposed

Finally, Select three of the shots that you or someone else took, and speculate as to what may have gone wrong with them and why.

Select three shots that you or someone else took, and say why it's good - what about it is appealing?

FINALLY, QUESTIONS!

What do you understand now about aperture and shutter speed?

What still confuses you about it all?

What can you do to improve your knowledge of it?
