CODECAMP

These school holidays Golden Grove Lutheran Primary is pleased to be hosting Code Camp, the holiday program where kids design, code, problem solve and become storytellers and creators of technology, by creating games, websites, music and videos, coding robots and so much more - in just 2-3 days!

Curious Minds
Ages 5-7 years

At **Curious Minds** we explore BIG IDEAS and learn how technology and science are shaping our world. Over 2 days, we will investigate topics such as robotic prosthetics limbs, cars of the future, cryptocurrency & bitcoin, and so much more via fun and engaging hands-on (screen-free) activities. Your kids will come home and be teaching you!

Spark
Ages 7-12 years

Fun, engaging and challenging... and our most popular Code Camp that over 100,000 students have completed. **Spark** is where every student in years 2-6 should start their Code Camp journey. Your child will design an engaging platformer game (similar to Mario Bros.), and then bring it to life with intuitive, yet powerful, drag and drop code. Learning the fundamentals of coding gives children the confidence and knowledge to be in control with technology – not just as a passive consumer, but as a creator, problem solver, and digital storyteller.

DreamWorks Trolls have arrived! At Spark kids can create their own arcade-style game starring Poppy, Viva or Branch, choose awesome backgrounds and collectibles from the movie Trolls: Band Together, and bring their game to life via drag and drop coding.
