

# Woolworths Junior Landcare Grants Program

## Successful Woolworths Junior Landcare grant application!

We've been successful with our application for a 2022 Woolworths Junior Landcare Grant for our project, **Bee Gardens**. The **Year 6** classes have been focusing on Bees this year in our garden program. They have been researching about Native Bees, specifically ones that reside in Victoria.

### Bee Gardens

#### MONTMORENCY SOUTH PRIMARY SCHOOL

The aim of our project is to create bee gardens to encourage and promote pollination in our school garden. The children will be involved in designing, planting and building bee gardens with shelter, flowers and places to drink around the school. The expected (environmental and educational) outcomes of the project include: to learn about bees and pollination, help encourage bees to enter and pollinate in the garden, to protect western and native bees from their depleting population statistics.

Montmorency South Primary School is one of 1,054 primary schools and early learning centres throughout Australia receiving a Woolworths Junior Landcare grant to help grow our next generation of environmental champions.

The Year 6 students and Jenny Farrelly, are looking forward to working and learning from this project and we'll keep you updated on the results.
