## Being successful

Money is not the way to success but money will help you to it and i think happiness is success here's why.

Your dream may be starting a business and money will make easier to get it started. It says money will help start your business or you may not need money at all because you could be a pizza delivery driver and still be happy.

Happiness is a lot of things and whatever it is or wherever it is you should always aim for it. It is said that if you are happy its better for your health and relationships happy people are less likely to get sick have more friends and be more productive make others happy as well. You want to be social, calm and fit. It will help a lot when you are young there will be less stress and more focused work.

Getting through your dreams is important!!! It makes life more worth living and it will get you through the toughest of times. It says if you talk to others and socialise if you do you will be more happy and motivated to do things doing things you hate will make days go slow.

Being successful can require money but success is just to be happy and never give up on your dreams because your dreams will lead you to success and happiness.
