ANIMALS (FAUNA) SURROUNDING ULURU

There are a lot of amazing animals at Uluru such as dingos, kangaroos, southern marsupial mole and the blue tongue lizard. But there is one animal that stands out and it is... The thorny devil. The thorny devil can change colour depending on their body temperature some of the colors are yellow, tan, olive and brown. The thorny devil specializes in eating ants to keep dangerous ant numbers low, it communicates by bobbing their head and waving their legs. Now you know about the thorny devil.
