WOW, what a wonderful way to conclude Term 3! It has been nothing short of impressive... the way student and adult experts from within and beyond the community provided a week of applied learning. A big thank you to the brains behind the idea Jenny, Deb and the Student Leadership team. Thank you to Chris for getting it off the ground for the F-2 students. The biggest THANK YOU of all goes to the incredible EXPERTS, the feedback has been so positive and the learning experiences that have been observed on the classroom platform have been heartwarming. See some of the pictures sent in by classroom teachers. The lessons will be online for the holidays, so you can keep exploring what our wonderful community has to offer.

Jack - NF

One of my highlights was doing the lessons with my sister, lots of people did lessons with siblings. That's pretty cool. Connecting more with the community and our families. So great to do fun and creative things together with our families. Alice AL

Expert week was really nice because you got to pick your own lessons and had freedom to choose. There were so many different lessons and subjects so you could learn about anything you wanted instead of just maths, reading and writing. Charlie JW

Cassius - RAH

Trainer Name: Cassius

Michael - BD

Isla from Unit CE.

It was nice to see the community work together, to teach each other skills & things that you might not know. It was a really nice community event. Antonia AL

Ella Cunningham - MR

Trainer Name:Eowyn

Dog's Name: Chicko

Gabi Ibraheim in CB and his little brother Rafi

Nino O'Sullivan - MR

Ekene making scones and playing chess - LF

Isla cleaning her bike - LF

TD - Paper Planes - Aqil Abdillah

TD - Art of the Book - Alita Simpson

TD - Stain Glass Chalk - Jasmine Ferguson

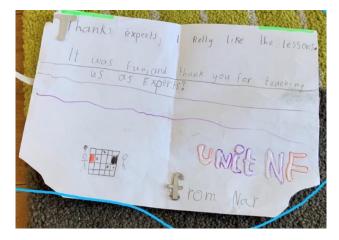

Seeing everyone doing my lesson, it was so nice to see that everyone enjoyed it! Antonia AL

Thank you letters form NF

I feel like it was great to learn things from the community and to feel connected that way. It was really special to be able to learn about things that weren't in the regular curriculum, going beyond the academic stuff to learn in a different way. It was such a great way to get a taste for all things out there, and choose what interests you. AL
