[1] Significant difference = <0.00001	Significant difference = <0.00001	Significant difference = <0.00001	Significant difference = <0.00001
[2] Effect size = 2.96	Effect size = 1.76	Effect size = 3.50	Effect size = 1.89
Importance: HUGE	Importance: huge	Importance: Massive	Importance: huge

[1] Significant difference, statistically usual anything less that 0.05 (1 in 20) is considered to be valuable. This is actually less than 1 in 100,000 by chance alone.

[2] Effect size, Cohen's d, is a measure of the importance of the outcome rather than its by chance alone probability. Cohen's d > 0.8 is considered important, d >0.5 is considered moderate; d>0.3 interesting; anything over 1.5 is considered to be 'bleedingly obviously important !
