

Experience ECU Day | Friday 27 September

Medical & Health Sciences | Year 11

Time of event: 9.00am - 3.30pm

Venue: ECU Joondalup Campus, 270 Joondalup Drive (Meet: Building 8.101 Lecture Theatre)

Experience what it's like to study at Edith Cowan University. You'll be able to explore our campus, meet academics, ask questions of our current students, find out about our courses and learn about our entry pathways. Experience what ECU has to offer by taking part in a variety of workshops in our real-world facilities. This program aims to give you an insight into what it's like to study Medical and Health Science courses at ECU.

Participants go into the draw to win awesome prizes! ALL students must be registered to attend. This event is FREE.

Session Outlines | Students participate in all sessions.

3D Food Printing

Step into the future of food, where you'll see how 3D printing is turning ugly fruits and veggies into amazing edible creations. Learn how this cutting-edge tech transforms pureed produce into cool designs, making meals more fun and enticing for everyone, from kids to the elderly. Plus, find out how this innovation fights food waste and helps people stay healthy, all while pushing the boundaries of what food can look like!

Hair DNA

Embark on an intriguing journey into Forensic Science and unravel the secrets hidden within strands of hair through microscopic hair analysis. Explore how examining hair under a microscope becomes a powerful tool in criminal investigations by uncovering the distinctive features and unique clues that strands of hair hold, and gain access to ECU's state-of-the-art SuperLab.

Leap into Action

Step into the world of human performance with the School of Medical and Health Sciences' dynamic workshop. Delve into the fascinating intersection of physiology and movement as you uncover the secrets behind reaction time and jump height. Through engaging hands-on activities, participants will gain a deeper understanding of the factors influencing these key metrics of physical prowess. Join us as we leap into action and uncover the science behind human agility and athleticism.
