

A WORLD OF POSSIBILITIES

Careers Program at Preshil

Open-Minded ▪ Inquirers ▪ Balanced ▪ Risk-Takers ▪ Thinkers ▪ Knowledgeable ▪
Communicators ▪ Reflective ▪ Caring ▪ Principled

PRESHIL VISION STATEMENT

At our core remains an unshakeable commitment to encouraging all children to progress at their own pace towards their own goals and to be respected as individuals in their own right. This means a commitment to our children to be nurtured and challenged in an atmosphere that inspires creativity and independent thinking in all areas of life and does not, overtly or subtly, use competition or punishment to motivate through the fear of failure. As global citizens we encourage an awareness of world issues and encourage effort to make a positive difference. We believe that education should prepare students to be thoughtful, peace-loving and active citizens of the world. Preshil will remain a school that puts kindness, compassion and social relationships at the centre of its operations.

SHAPING OUR EDUCATION

The aim of the CAREERS program is closely aligned with the Preshil's Vision Statement and the overall IB Program. Whilst there are always job specific skills the employers look for, there are eight skills employers look for no matter what industry you are working in:

Communication
Teamwork
Problem solving
Initiative and enterprise

Planning and organising
Self-management
Willingness to learn
Technology skills

CHOOSING AND RESPONSIBILITY

Career development can start in the early years of schooling and will allow young people to discover their potential, explore their career interests and link their learning to future successes in life.

The goals of the Careers Program is to assist young people to:

- Understand and manage influences relating to career planning and lifelong learning;
- Develop skills, knowledge and capabilities to make career decisions through critical thinking, inquiry and research.
- Apply their learning to achieve educational and career aspirations; and
- Build resilience in their capacity to manage change throughout their lives.

Students develop skills, knowledge and capabilities to make career decisions through critical thinking, inquiry and research to manage change throughout their lives.

DESIGNING OUR FUTURE

The new understanding of 'Career' is vital in a time where the world of work is changing as we know it. Youth today need to be prepared to manage multiple career's over one's life time. Understanding their transferable skills can prepare them for a future where they may experience 15 to 20 times more jobs during their working life.

“In an environment characterised by change, people need to recognise and value their own fluidity and develop resilience in the face of constant change.”

High Five Principles of Careers Development
