

## Year 6 Term 4

Can you believe that it's the final term for our Year 6 students? We have an action-packed term ahead of us! In the classroom, we'll be engaged in a novel study, delving into the world of fractions, and revisiting various math concepts. Additionally, we'll be working on writing pieces to contribute to our memory book. Next term, we have two inquiry focuses:

### Health:

- What are some preventative health strategies that promote health, safety and wellbeing for individuals and their communities?
- What are some community resources that assist the health, safety and wellbeing of individuals?
- How does the media influence personal attitudes, beliefs, decisions and behaviours?
- How do members of the community influence personal attitudes, beliefs, decisions and behaviours?

### Business and Economics:

- How and why do people work?
- What factors may affect work in the future?
- Why are there trade-offs associated with making decisions?
- What are the possible effects of my consumer and financial choices?
- Why do businesses exist and what are the different ways they provide goods and services?

To culminate their learning from both units, students will collaborate to develop a product or service for their Year 6 market stall.

We also have planned several exciting extracurricular events, including the bike hike, lifesaving activities, Reach program, Courage to Care, graduation, and, of course, our musical production, Matilda Jr. We're looking forward to a bustling term and encourage our students to seize every opportunity in their final term of primary school.

Dates and events will continue to be shared so everyone is marking in their calendars.

Regards,

Caroline Bowler, Lindy McManus and Grace Hulls  
Year 6 Team
