

TRANSDEV SCHOOL SERVICES TERM 3 UPDATE

The Victorian Government recently announced a return to remote learning for prep to Year 10 students for the start of term 3. On-site learning will continue to be available for VCE students, students attending specialist schools, children whose parents can't work from home and vulnerable students without access to a suitable learning environment at home.

To support these students and their families, Transdev will continue to operate all school services to your school community.

The safety of your students and our drivers remains a priority, so please help us ensure parents and students are informed and ready to travel by sharing the information below:

- We are no longer accepting cash on board our services. Students are still required to travel with a valid ticket, however we ask that you advise students to top-up before they travel
- We have increased the frequency of cleaning and sanitisation of all our buses, including "high touch areas" such as handrails and posts, grab straps, seat top handles, window ledges and bell presses
- We are requesting all passengers who can, to enter and exit the bus via the rear door to maintain social distancing. If your students need the bus lowered or the ramp, our drivers will assist them to board via the front door.
- If students feel unwell, they should not travel and get tested.

Despite the extraordinary times, we continue to focus on keeping an essential service running and ask for your support in ensuring your students touch on when catching our services.

Take care,
Transdev Melbourne Schools Team
