

Melbourne City Reflection

The people that were in my team were Daniel, Hannah and J Josh.

W1 the first week it was about of being in a team, building own robot and have a play with them.

W2 the second week we wants had a play with them and we played memory tag, uropan had ball and soccer.

W3 in therd week we did a lot of coding and we learn how to chance the color of the eyes of the robot and we played lin tag and number soccer.

My favourite part was when we played soccer with the robot and it was a competition. And everyone what tedded to win was they will be on the top of the ladder. And one o-f my favourites thing is when we played European had ball and soccer because we work like a team.
