

**Dice**

**Cricket**

## Partner Up!

Need your Maths book and a pencil and a 6 sided dice

One person 'BATS' and the other person 'BOWLS'

The BATTER records their runs when the BOWLER rolls the dice

1 = 1 run

2 = 2 runs

3 = 3 runs

4 = 4 runs

6 = 6 runs

If the BOWLER rolls a 5 - that means the batter is OUT!

You get 10 BATTERS

Then swap over.

Use addition and/or multiplicative thinking to work out who wins!
