

Gifted Insights Mentoring Gifted Kids at Upwey South Primary School Eight one hour experiences in a small group

Fee \$260 including GST

Classes begin Tuesday 23 August. Proposed dates are 30/8, 6/9, no lessons final week of term three or first week of term four, 11/10, 18/10, 25/10, 8/11 and 15/11.

Hands-On Equations: Making Algebra Child's Play!

Historically the most popular unit with children and parents. Children don't want it to finish and parents wish they had learnt algebra like this.

Put your thinking caps on and get your hands ready to learn to solve linear equations.

You'll use pawns and coloured number cubes with balances, to really understand how equations work, and learn legal "game" moves to intuitively solve for the value of the pawn.

Learn to use algebra to solve all sorts of worded puzzles and problems.

There are multiple levels, so the program is suitable for year one beginners through to year six advanced mathematicians. Equally suitable for very strong maths students and those who are developing and extending their skills and confidence.

Everyone will work at their own level and pace.

Special note to students who may have done some algebra in class or Hands On Equations with Gifted Insights before: the senior material goes to year 9 ... plenty of new challenges waiting for you!

Testimonials from parents

"I also found attending last Thursdays class was brilliant, as someone who loves maths and having done high level high school maths I found the way Jennifer taught algebra to such young kids was amazing and so intuitive.

Kind regards

Kate"

and

"As a parent, I've found the last unit, Hands-on Equations very useful, especially for the kids not so much into maths."
