

HANDS ON LEARNING

WISH LIST

IBC's – Cleanish and not previously used to store hazardous materials. Preferably without holes as they will be used as wicking/self-watering gardens.

Bluestone blocks/bricks – for edging of garden beds or paving pathways.

Timber – For building projects. It can be pretty much anything except CCA treated pine. Old hardwood fence palings or cypress pickets are handy to have as well if you or someone you know is replacing an old fence. We would also be happy to accept certain heat-treated pallets. Please contact Mr Holden if this is something you can donate.

Nails / Screws / Fixings – We have nothing so if you have a weird box of different screws/nails/nuts & bolts etc then we would happily accept. We also need timber glue.

Paint – At the moment we need some outdoor paint to paint our container. The brighter, the better. We also need some light-coloured paint to paint the inside of the container. We cannot accept oil-based paint.

Garden / Landscaping Tools – Long handled shovels, garden (metal) rakes, post hole shovels, outdoor brooms, steel tampers.

Hand tools – Screwdriver sets, Allen key sets, spanner sets, socket sets, shifters, quick release clamps, saw horses (foldable),

Power Tools (battery power only) –

Student use: drills, impact drivers, impact wrench, blower, vacuum & sanders.

Teacher use only: sliding mitre saw, circular saw, jigsaw.

We would also be happy to accept any battery-operated tool, regardless of brand, as long as it is in safe working order and comes with battery and charger.

We are trying to get in contact directly with Ozito to source some tools from them so if you have a contact that works with them then please speak with Mr Holden.

Thank you for any support that you are happy to provide.
