General

A buyer's market: The top graduate employers for 2022

Each year, the Top 100 Graduate Employers report looks at the state of the workforce in Australia for university graduates. The report is published by the Australian Financial Review in partnership with GradConnection, and lists the industries that are popular with graduates, plus a wealth of insight and analysis into the current job market for those entering. Despite the challenges of online learning and general disruption caused by Covid-19, we have arrived at a graduate's market, where employers are being kept on their toes and working hard to attract talent. While previous years painted a bleak picture for graduates and young job seekers on the hunt in a recession, the rebounding job market has led to far brighter prospects.
