

Hello,

Laura is a Speech Therapist with Little Lambs Speech Pathology, and Vivienne is a Psychologist with Vivacity Psychology. We have recently come together and registered as diagnosticians approved by Autism SA to do autism spectrum disorder (ASD) multidisciplinary assessments. We are administering these on Monday's, in Modbury, for individuals six years and over, including into adulthood.

The full cost is \$2100, and this includes screener questionnaires, developmental interviews, observations of the child and/or client, and interpretation of Vineland questionnaires (assessing functional capacity) to support any applications for NDIS funding. We both collaborate following testing and write up a comprehensive diagnostic report.

If you have any families in your care needing assessment (or on long waiting lists), please consider passing our details onto them. Because we are only just beginning assessments, we still have some current availability.

With regards,

Little Lambs Speech Pathology
