June 3

### Mabo Day

Leaf Art

June 4

### Reconciliation Week

Making our Family Tree with Indigenous Art

June 8

### World Ocean Day

Fun facts about sea creatures

## What's been happening...

### FOMO Clubs are back!

Hello to our families and children!

We hope this school Term is going well for you, as for us it has been amazing! We have seen our children taking leading roles in our Yarning circles, where they announce the activities of the day, the snacks we will have as well as selecting a topic of discussion, such as "What makes me proud?" "What is your favourite hobby?" "What do you know about earth?" etc.

We continue to learn more about space and the solar system, we did Ions In action experiment, made alien cupcakes and sun paper art. They have found different educational games and activities to do with their peers on the NASA Kids website.

Next, we will be compiling a series of mini surveys to update our Quality Improvement Plan. This is very important for us as we are expecting to be assessed this year. Your opinion and feedback matter to us, so please participate in the upcoming surveys.

See you all soon, have a great day :)

## QIP Focus

### Term goal

Our goal for the rest of this term is to have the children take on a leading role in the program. They choose the activities for the week, make their menu and order resources and run the program based on the routines.

## Club News

### FOMO Clubs

FOMO Clubs are back!

This week we started with out 2 new clubs, Street Eatz and STEM Station.

We made Bhan Mi's and learnt about why they are so famous In Vietnam. We used fresh veggies and vegan "chicken" strips.

In our STEM club we did a Will It Float Challenge, we made little rafts and boats and had a mini water race

Watch this space as we will be updating you on how the clubs are going and the wonderful things the children are making!
