Scholarship Details

Victoria University Secondary College is a school community that strives to provide a holistic education that develops the gifts of each student. We encourage our students to participate fully in the school's curriculum, co-curricular program and community activities.

Supporting high-achieving students to achieve their personal best is the central purpose of the Deep Learning Program at our College. The program was implemented to provide opportunities for academically ready students to be challenged and learn at their level across a range of subjects, in preparation for VCE. The Deep Learning Scholarship Program recognises and acknowledges students who take responsibility for, and are proactive, in the development of their own education.

Scholarships are valued at \$500 and are redeemable against school expenses including curriculum and extra-curricular contributions, electives, uniform and textbooks.

Applicants are not required to sit an entry exam.
