

Student Name: _____

Grade: _____ Date: _____

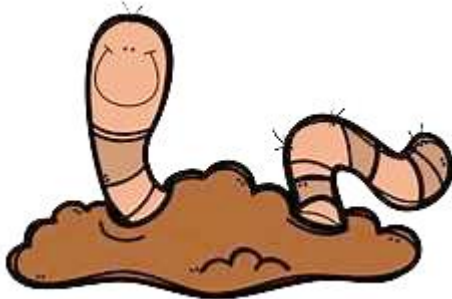

1. At the movies, Kylie bought an ice cream for \$4.50 and some popcorn for \$2.50. How much did she spend on those items altogether?

2. Each episode of the TV program “**SHAUN, THE SHEEP**” runs for 15 minutes. If a “SHAUN” program starts at 7:20 am, at what time will it finish?

3. In a 50-metre race, Joseph came 7th. How many runners finished in front of him?

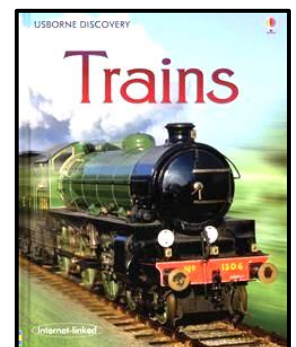

4. Zoe was planting tomatoes in the garden, when she found a worm 7 cm long. If that worm doubled in size in 2 weeks, how long would it be then?

5. In Mia’s house there are 9 remote control units. If each of them uses 2 batteries, how many batteries are there in all those remote controls altogether?

6. Geoffrey, a 9-year-old, had a “**BBQ**” birthday party. His parents set up a BBQ in their backyard. They barbecued 21 sausages, but only 13 were eaten. How many sausages were left over?

7. Zac's book about "**STEAM ENGINES**" has 28 pages. How many **ODD**-numbered pages are there in that book?
