

Lume Excursion

On the 6th of June we went to The Lume in Melbourne City and visited the Leonardo Da Vinci Exhibition. The exhibition included original drawings of his own, a replica of The Mona Lisa, drawing tutorials, his inventions and much more. We started off the day with a 45-minute bus ride to The Melbourne Convention Center where we had 15-minute break and ate our snack. We then split off into groups and went inside the Lume and saw many fascinating inventions and artworks. We stayed inside the Lume for approximately an hour and 45-minutes. There was realistic music in the background whilst we got to admire the paintings and inventions of Leonardo Da Vinci.

After the exhibition, we were able to go to the DFO and bought some lunch. There were many options of yummy food in the food court, and we stayed in the DFO for around an hour and 10-minutes. At around 2 o'clock we hopped back on the bus and made our way back to school where we got dismissed and went home.

Overall, I think this was a great experience and if I had the opportunity to go back and visit the Lume again, I definitely would.
