Custom Signage - Engineering

Company Profile...

Comcut Group was established in 1995 in Mulgrave NSW as a sole trader in the signage industry. In January 2010 we completed the construction of our new 1400sqm state of the art manufacturing facility located at 115 Railway Rd North, Mulgrave, only 100 metres from our humble beginnings.

We have a dedicated team of 20 staff which include Graphic Designers, Project Managers, Sign Manufacturers and Installers. They allow us to have the most stringent quality control standards in place. From concept designs to prototype samples and developments to manufacturing and installation, we have the expertise to assist you every step of the way.

Entrust an expert...

A daunting task for any business or organisation is knowing how to promote who they are and what they stand for. It is clearly a visual statement that signifies their quality and commitment to a product or service. Gone are the times that you simply put a sign on a building with your business name and phone number... waiting to see what happens. Your presentation is your best marketing tool. No other form of advertising will endure or say as much as "the name on the door".

So entrust an expert in the design and manufacture of your branding profile. We guarantee the combination of expert knowledge and design skills with a state of the art manufacturing and technology centre that can create a visual statement beyond any other.

Award winning signage company...

Comcut Group entered the Australian Signs & Graphics Awards and were awarded the following:

2014 - Gold Award / Illumination - Neon. Bronze Award / Fabrication - Pylon and Sky Signs.

2018 - Gold Award / Router Output. Highly Recommended / Fabrication - Pylon and Sky Signs.

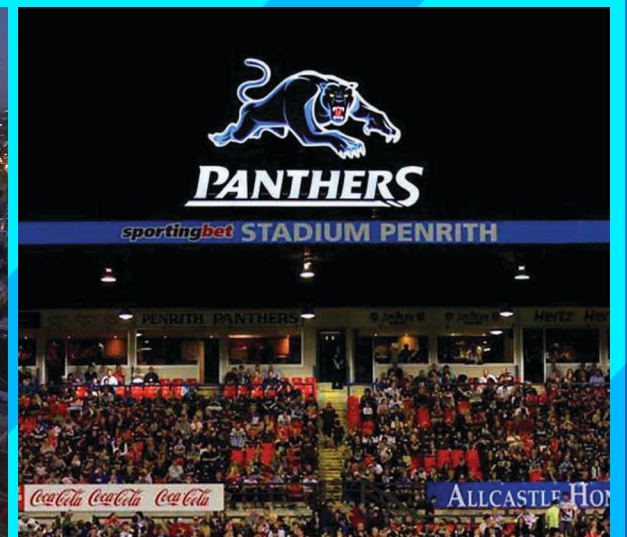

3D Signs

From simple to complex images, Comcut Group can create your 3D signage in a range of materials including aluminium, acrylic, stainless steel, timber or combinations thereof. A 3D sign is often seen as a mark of quality and a reflection of the success of a business. Fabricated signs give a 3D effect to your logo or branding. Lighting and illumination effects can add another dimension.

Light Boxes / LED Signs

Comcut Group are specialists in the manufacture of custom made light boxes. Suitable for internal and external use, our light boxes are manufactured in Australia to the highest quality and standards. An illuminated light box is an enclosed frame equipped with internal lighting and is usually constructed of aluminium. Panels can be made from acrylic, polycarbonate or a flex face banner allowing graphics to be illuminated.

Pylon Signs

Pylon signs are a huge advertising and marketing tool for any company or business. They attract passing traffic to give your business the added edge. They can range in size from 2 metres to 25 metres in height and can be customised to suit any application. Comcut can offer many options including fully illuminated, spot lighting, LED moving message signs, temperature and clock displays. The options are endless.

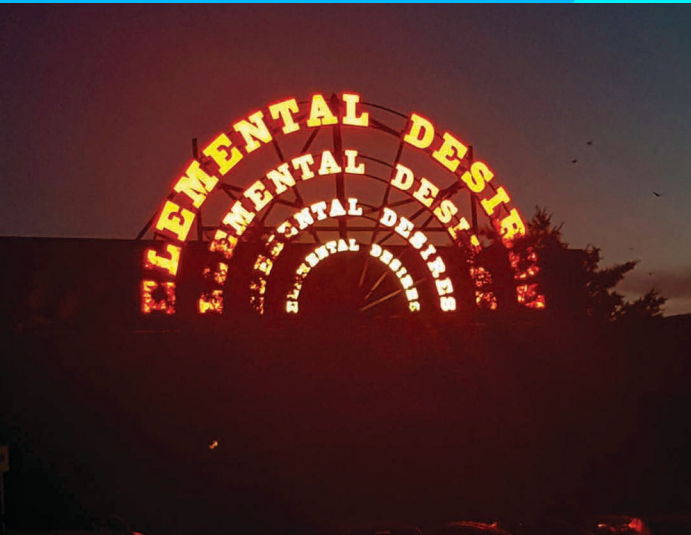

Corporate Signs

Your name says it all. It is your brand and your reputation. At Comcut Group, we design, manufacture and install signage with a corporate style using 3 dimensional lettering and logos with the option of the signage being illuminated or non-illuminated. We also specialise in multi-site branding to keep your image the same Australia wide.

Street Art and Sculptures

Beautifying our public spaces allows everyone to appreciate our local community even more. Comcut has a growing reputation for a company that thinks outside the square and with the collaboration of Artists and Architects transforms your ideas into living art. With our wide range of expertise in many trades, such as lighting, metal and plastic fabrication, LED and Neon, Stone and Traditional Art, we can bring your ideas to life and a build which will be appreciated for years to come.

Shop Fronts / Fitout

It is a known fact first impressions count! The design and manufacturing team at Comcut can create a visual impact that people will remember and keep coming back. Whether you are opening a new store, revamping an existing store or doing a multi-site re-branding, we can assist you every step of the way. From custom made light boxes, neon and LED signs or custom made themes and sculptures the team at Comcut can create that lasting impression.

Vehicle Signs

Your company vehicles are one of the most cost effective forms of advertising available. Wherever you travel you are promoting your product or business. From a carpark to driving the highways, your vehicle is one of your best promoters. Vehicle signage is one of the most effective ways of advertising, it is working for you 24/7 to promote your business.

Digital Print Signs

Digital printing is used in the production of most types of signs, ranging from banners, building signage, shop fronts and vehicle graphics. Current digital printing technology produces stunning images. Digital printing allows us to achieve high resolution, quality images, which can be applied to a wide variety of signage, and it is suitable for indoor and outdoor environments.

Neon Signs

Neon Signs are produced by the craft of bending glass. This form of illumination is a bright and powerful form of advertising. Neon signs have been around for decades and have an application which gives it a class of its own. It is bright and vibrant and when applied in the correct signage application can create a fantastic visual statement.

Profile Cutting / Engineering

The team at Comcut are proud to offer quality profile cutting, we have the equipment and expertise to meet your requirements and a commitment to quality which has resulted in Comcut Group becoming a respected industry leader. Our expertly trained staff can machine most materials such as stainless steel, brass, copper, acrylic, polycarbonate, PVC, timber, aluminium and mild steel just to name a few. We can machine to a very close tolerance of 0.01mm.

Engraving

Our engraving department can engrave your smallest detail from 1 mm high all the way up to large detailed signs 6m long. Materials such as timber, aluminium, stainless steel, Traffolyte and brass are easily machined, your signage will stand the test of time, adding a touch of class and a mark of quality. Laser and Rotary engraving are the two main types of engraving methods used, and Comcut Group offer both these services to produce high quality engraved applications.

Sand / Grit Blasting

Sand Blasting or Grit Blasting, as it is also known, is a process of smoothing and cleaning a surface by forcing solid particles across a surface at high speeds using compressed air. Comcut has a purpose built unit that will allow you to be creative by etching pavers or stone works with your words of wisdom or artistic flare.

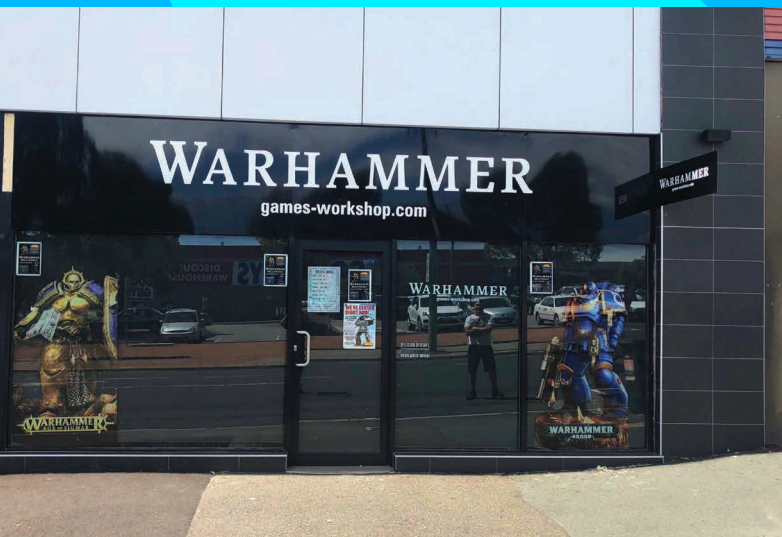

Statutory / Directory Signs

Find where you are going with our stylish custom made directory boards available in timber, acrylic, aluminium and stainless steel. We can create a system to suit any application from reception and foyer entry signs, elevator directories, way finding signs, parking signs, amenity signage and emergency evacuation signage which all comply with the Australian Building Codes. We also specialise in all your braille signage needs.

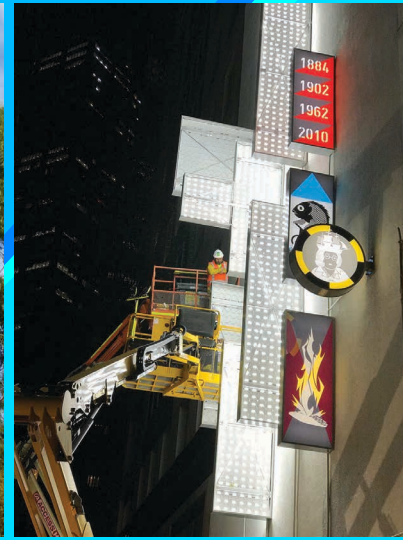

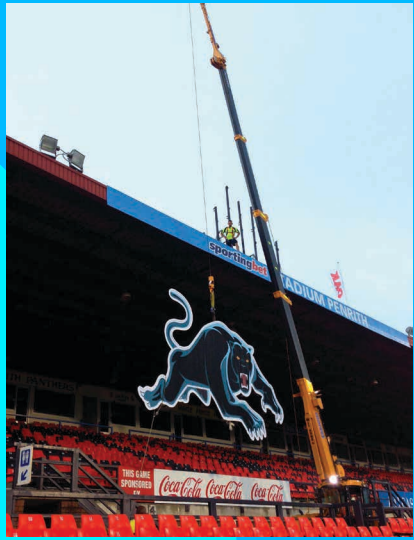

Multi-Site Branding

To promote your brand in the market place with a new logo, name or design is a necessary process to consider professional implementation of your brand. You want to ensure your image remains competitive. Comcut Group has managed this process on behalf of multiple companies Australia wide, a process consisting of Designing, Fabrication, Installation and Maintenance.

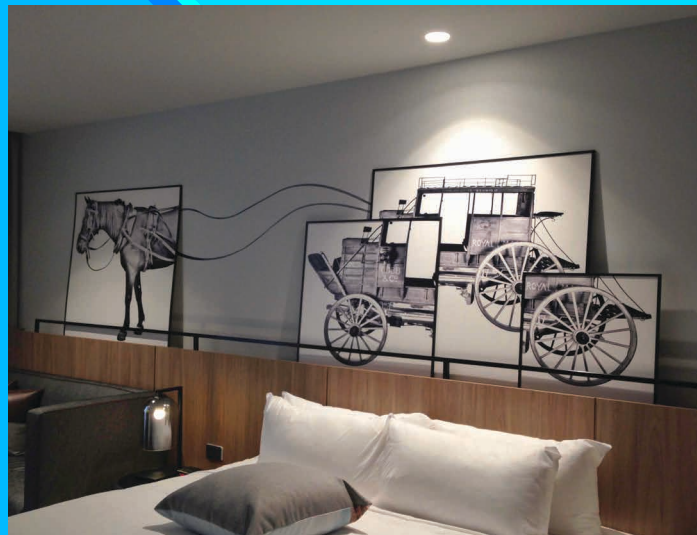

Install / Service / Repairs

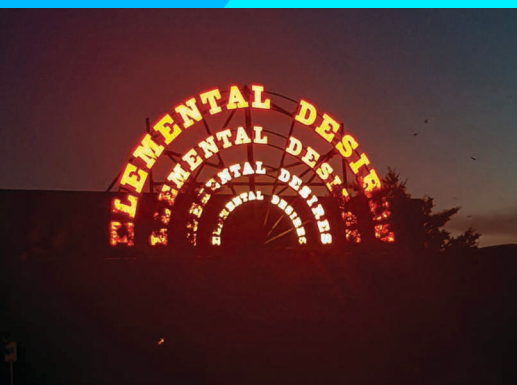

The manufacture of your signage requires expert installation so it will last for many years. Our installation and service team install and maintain small one off signs to major projects and multi-site branding Australia wide. Let the team at Comcut Group take care of all your signage service and repair needs. Our team are licenced to use various forms of EWP and access equipment. We will ensure all works are carried out in a safe and professional manner.

Graphic Design / Business Stationery

Comcut Group has always had a strong focus on design with extensive experience in signage design. Our in-house design team utilises our state of the art computing equipment and software to bring your ideas to life. We also offer competitive pricing and quick turnaround on all your business stationery needs. We can print from your supplied files or you can allow one of our experienced Graphic Designers to do the designing for you.
