School Readiness

Our School Readiness program is designed to help your child transition confidently into formal schooling. Through small group sessions, we nurture pre-literacy, pre-numeracy, social skills, emotional regulation, independence and resilience — all tailored to your child's unique learning path. With experienced, passionate educators guiding the way, your child will begin school with confidence and a toolkit of strategies to thrive.

Lego Club

More than just playing Lego

We transform play into powerful social learning. Each week, children aged 5–8 (Prep to Grade 3) work together building LEGO® models through assigned roles like “engineer,” “supplier,” “builder,” and “director.” This structure encourages turn-taking, cooperation, communication, and shared decision making, all within a gentle, neuro-affirming environment. More than just play, our program is designed especially for kids who find it challenging to make or keep friends, share, or take turns — and supports them to build confidence, connections, and social skills through creativity and collaboration.

Pre Kinder

Our Pre-Kinder program offers a gentle, play-based introduction to structured learning environments. Tailored to children aged around 3–4 years, it gives little ones the chance to explore, interact, and develop foundational social, motor, language, and emotional skills in a safe, nurturing space ensuring each child's individual pace, strengths, and interests are covered.

Social Skill Groups

Calm Kids - Social Explorers

Our social groups provide structured, supportive environments where children learn to build friendships, communicate effectively, understand feelings, and navigate social dynamics. Whether your child is neurodiverse or simply needs more guided peer practice, these groups help strengthen social confidence, self-awareness and belonging — all in a safe, inclusive setting.
