Finance

TNA start-up cost would be \$17,000, which we would get from Mr. Cork and a loan from the bank. The expense per a unit would be \$45

- Cream \$10
- x2 Chips \$20
- Packaging \$15

Price per a unit would be \$57 or \$67 (overseas cost)

\$45 product \$2 for the app \$10 packaging \$10 overseas (optional)

Profit per unit is \$12 or \$22 (overseas cost)

$\$57 - \$45 = \$12.00$ $\$67 - \$45 = \$22.00$

What we would do with the profit is spend \$6 or \$11 on products needed and other half on saving for college.

Product idea

- Our intentions is to make it easier for those who found problems dying their hair in the past. If you use our product we can ensure that, our product will not disappoint.
- How does it work?
- Put the cream on the place you want the dye your hair. There would 2 chips, chip A and chip B. you put chip A in your hair and it stays in there for 5-10 mins. The chip communicates with the app on your phone, that app helps you to choose, what colour and how you want your hair dye to be. After at least 10 mins u take the chip A out and put it in the bin(optional). Keep the chip B w/ you all the time, just in case u want to change your hair colour back to your normal hair

Why do customers need our product?

Many people struggle to find the right hair dye for their hair. Many hair dye damages your hair quickly because it's too harsh. Our hair cream is gentle on any hair type, and customers can dye their hair whatever colour they want, without worrying to bleach it. Our hair dye is faster, and cheaper than others.
