

MELBOURNE CITY REFLECTION

So far I have really liked the workshops run by Melbourne City Football Club. I enjoyed building the robots as it was a challenge but my group was able to finish in that session. In my opinion the outside activities are the best bit. We have played European handball, Number soccer, Memory tag, Line tag and Soccer. It's really fun to have a kick and play with your friends. The coding is fun as well, our group changed the lights on the bot and made it play music. I really loved racing against the other groups and doing the robot soccer world cup. I think we could build more obstacle courses and maybe partner up with other groups too.
