# Australian's should come home by TYLER

I think australian's From India should Be aloud ~~to~~ now to come Back home. There Families are missing them and they are also studying.

Australians From india should come home because they dont want covid they just want to come home to australia. I think they should come home so it's fair for them. It's there home all there stuff's there that's were they where born

Also there families are missing them, say if they were on a travel to india and got stuck in ~~the~~ india. there might be students studying in india and wants to come home to there parent's so with that they should come home back to australia in lockdown remember we couldent see them dragging in a different country

it might ~~not~~ not just be australian's the could be americans or other countries and if 40000 people are ~~dieing~~ dieing aday. **THEY SHOULD COME BACK HOME** cause it's fair idont think they should have to stay there and get **COVID**. Covid is dangerous because it can kill you and they don't want to die

Australians or other countries should be allte to come home, there families are missing them they dont want covid or want to die so i think they should Be alle to come back home
