

Ronald McDonald House Orange (RMDHO)

What is there to know about this establishment?

How do they gather all their supplies for the families in need?

Everything in the house has been donated, from the breakfast cereals to the doona covers that people have made for them, and the construction for the house was paid for using donations by the community.

How many families can one house accommodate?

Ronald McDonald house is large enough to host 8 families at any one time. Rooms provide beds for large families of 8, so that means they can accommodate up to 64 people at the same time.

The rooms vary from a basic room with beds and basic bathroom, which would be for a family that would not be staying for long.

They are a fully functioning house with a mini kitchen, functioning living room, and laundry. The rooms are set up so families can stay for weeks, or even months. To have a small home like this relieves the stress a little, knowing that you are in a home away from home.

How do you manage to have so many people working there, wouldn't it cost a lot?

At Ronald McDonald House they only have two people that get paid and work full time. They have 130 volunteers working there for no cost and have donated their time to make sure that the house stays nice and clean, and the fridges stocked with food and most importantly keep all the family's that are there, feel happy.
