

HAVE YOU EVER SOLVED A
CRIME? No? I didn't think so.
They don't tend to trust kids
with that sort of thing.

We would like to offer your Year 8 students (in 2020) an opportunity to participate in the 2020 Talented Students' Forensic Science Camp. The camp, which will be held at The Armidale School from Tuesday 7 July - Saturday 11 July, 2020, is one of the state's pre-eminent extension programs for Year 8 students. It offers challenging and hands-on experiences of scientific problem solving and a chance to work with talented students from all over Australia.

As compelling as *CSI*, as challenging as *The Mentalist* and addictive as *Law & Order*, the Camp brings the intrigue of these television shows to the fingertips of young Australians. No one can resist a 'whodunit' and that is what this Forensic Science Camp is all about. It's fast and exciting with total immersion in the crime-solving process.

Run by The Armidale School as a boarding experience, the annual Forensic Science Camp was first held in 1994 and attracted widespread interest after it was featured on the ABC TV science program, *Quantum*. Last year, over 100 boys and girls, a mix of city and country students from both government and non-government schools, were selected from a large number of applicants from NSW, the ACT, Queensland and Victoria to participate in the camp.

The camp fills a niche for students looking to be academically challenged and appeals to all enthusiastic and highly capable students.

If you would like more information on how to apply please email forensic@as.edu.au or visit our website: <http://wordpress.as.edu.au/forensic/>
