

4a Learning Journey

Teachers Note

What a fantastic term we have had in 4A! I am incredibly proud of every student and the effort they have shown throughout the term. Everyone has worked so hard, challenged themselves and continued to make progress across all areas of their learning. It has been wonderful to see the students grow in confidence, independence and their willingness to have a go. Well done 4A — you should all be very proud of yourselves!

This term, our main focus has been **ASDAN**, with students developing their independence, communication and practical life skills. We have also continued working on **Maths and Phonics**, building confidence through regular practice and hands-on activities. A highlight has been our **school garden**, particularly learning about **composting**. Students have helped collect food scraps, learnt what can go into compost and explored how food waste can be reused to help our garden grow. It has been fantastic to see everyone getting involved and enjoying these practical learning experiences.
