

Why we should get the light boxes

I strongly believe that the school should purchase light boxes because they will definitely improve on our drawing skills and they will ensure students have greater concentration in the classroom.

Firstly, I firmly believe that we should invest in the light box because when our school is doing art or it is a rainy day we could use these to improve our drawing skills. For example students that are not very confident when they draw will now be able to access more support.

Additionally, having access to the light boxes will improve student concentration in the classroom. I've noticed recently that when we are doing art or something including drawing people have been giving up more and more and that's why I think we should get light boxes.

In conclusion, we definitely need to purchase these light boxes for our school. Not only do they help you draw they also give you more concentration when you are drawing.
