

Dear Year 7 and 9 students and families,

Year 7 and 9 students will need to install the Online National Assessment Platform *NAP Locked down Browser* on their personal devices in order to complete the *2022 NAPLAN Tests*. Once downloaded, the *NAP Locked down Browser* sits on the computer drive and is only activated once a student begins the testing.

Some time will be allocated for students to download the browser during school hours, but it is each student's personal responsibility to ensure that they have the *NAP Locked down Browser* ready in time for the online testing.

Families and students are encouraged to attempt the download in advance.

If a student is unable to download the browser, it is their responsibility to seek the support of the IT team in the library to access a school device for testing.

Students who need a school laptop must also advise Ms Charles (Year 7) via ruth.charles@det.nsw.edu.au or Ms Bouchier (Year 9) via esther.bouchier@det.nsw.edu.au.

Technical Specifications

- PC – Windows 10, 8 or 7
- Mac – OS X 10.10 or above
- Browser – Chrome (recommended), Firefox, Safari, Edge, Internet Explorer

Please see the following pages for instructions for downloading the Lockdown Browser for Windows or Mac.

Regards,

Ms Charles

Ms Bouchier

Mr Calloway

Mr Jeon

How to Install Locked down Browser – Windows

Click on link: <https://www.assessform.edu.au/>

Click on **Technology** and then **Locked down browser**, then scroll down the page.

The screenshot shows the NAP National Assessment Platform website. The header includes the 'acara' logo (Australian Curriculum, Assessment and Reporting Authority) and the 'NAP' logo (National Assessment Program). The main navigation bar contains 'Home', 'NAPLAN Online', 'Technology', 'Resources', and 'Other NAP events'. The 'Technology' link is circled in red. Below the navigation bar, the 'Technology' section is displayed. On the left, a sidebar menu lists 'Overview', 'Locked down browser', 'Device requirements', 'Technical Guidance and firewall requirements for schools', and 'Platform latency check'. The 'Locked down browser' link is circled in red. The main content area shows an 'Overview' section with text explaining that schools need sufficient bandwidth and wireless connectivity during the test window, and that schools will complete technical readiness testing (TRT) before the online assessment.

Scroll down to locate hyperlink for the appropriate **download** button to download the NAP Locked down browser application (app) onto your device:

The screenshot shows the 'Download locked down browser and user guides' page. It includes an information icon and text: 'For more information please refer to the locked down browser user guides.' Below this, it says 'Choose the appropriate browser or app to install on your desktop, tablet or Chromebook device (also applies to all Bring Your Own Devices).' There is a link for 'Device issues - advice for schools' (PDF | 439KB | v2.5 | Last updated: 22 Jun 2021) and a note to 'Check device requirements before downloading your locked down browser.' A red dashed arrow points from the 'Device issues' link down to the download options. The download options are circled in red and include: 'Windows v2.4.6 (Updated: 29-Jan-2021)', 'Check device requirements before downloading your locked down browser.', 'download for Windows 8 and 10 (.msi)', and 'download for Windows 7 (.exe) includes .NET 4.5.2'.

If you already have .NET 4.5.2 or later installed, use the .msi file as it is a much smaller file to download. If you are unsure if the computer has .NET 4.5.2 then use the .exe file.

Note: All devices need to be connected to the internet so that you can download the app and install it.

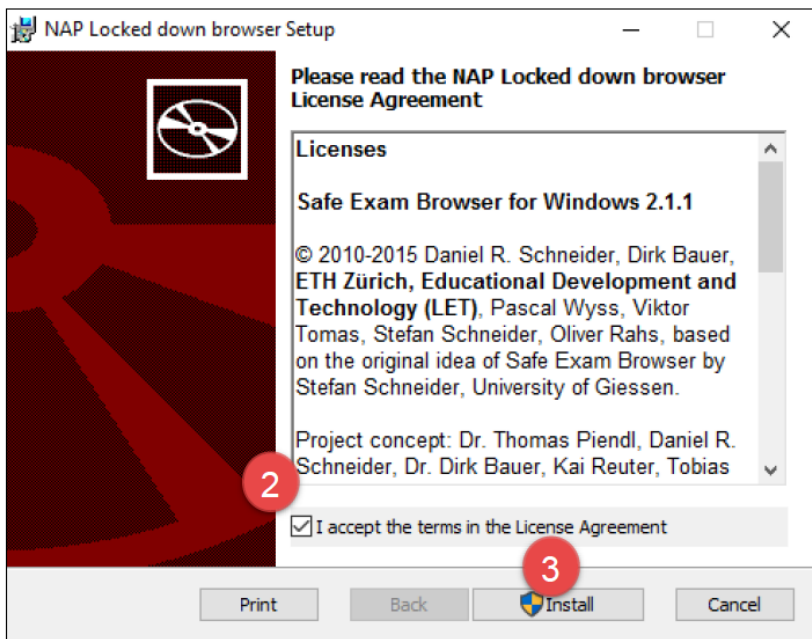

To install the .msi (microsoft)

Navigate to the locked down browser installer file (NAP Locked down browser.msi) using the operating system's file explorer. The file will be in the **Downloads** folder.

Double-click **NAP Locked down browser.msi**.

The installation wizard will launch.

Select **I accept the terms in the License Agreement**.

Select **install**.

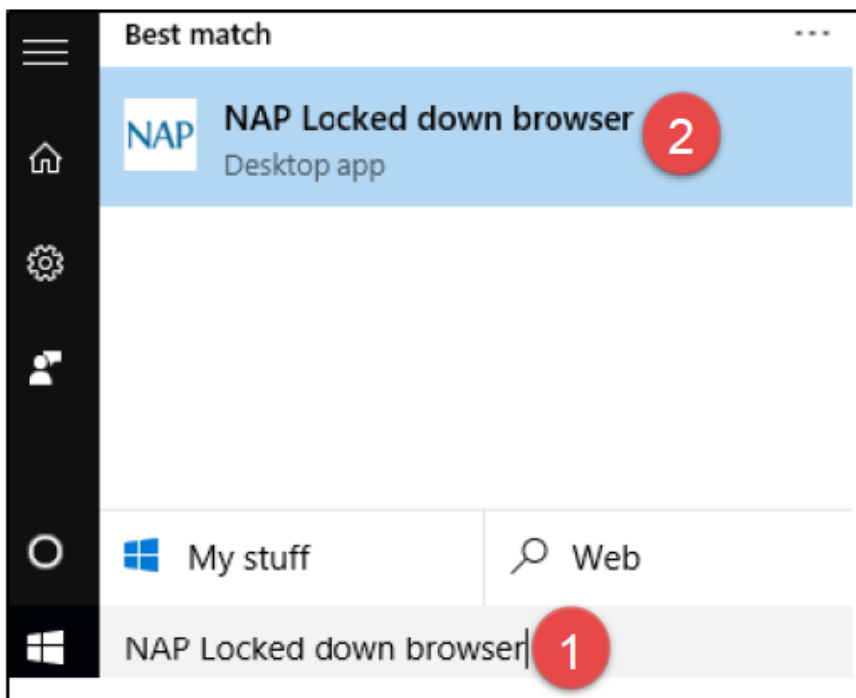

Wait for the installation to be completed.

When the installer indicates that it has completed the installation, select **Finish**.

Verify that the **NAP Locked down browser** shortcut is available on the Desktop.

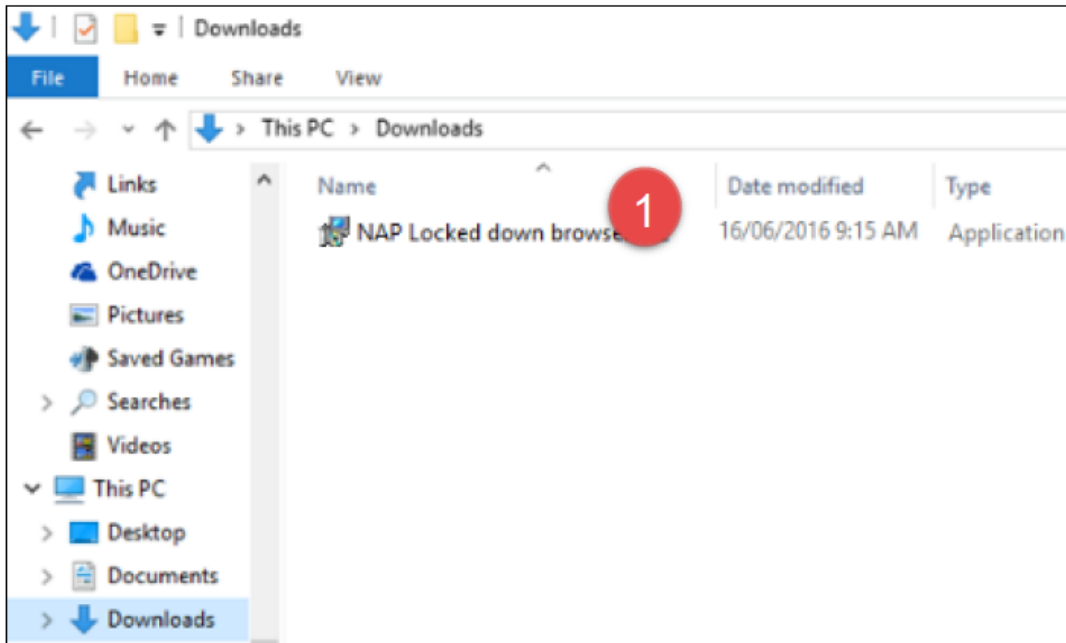

Select the Windows **Start** button and search for **NAP Locked down browser**.

Select **NAP Locked down browser** to launch it.

Refer to '*Connection steps*' at the end of this document.

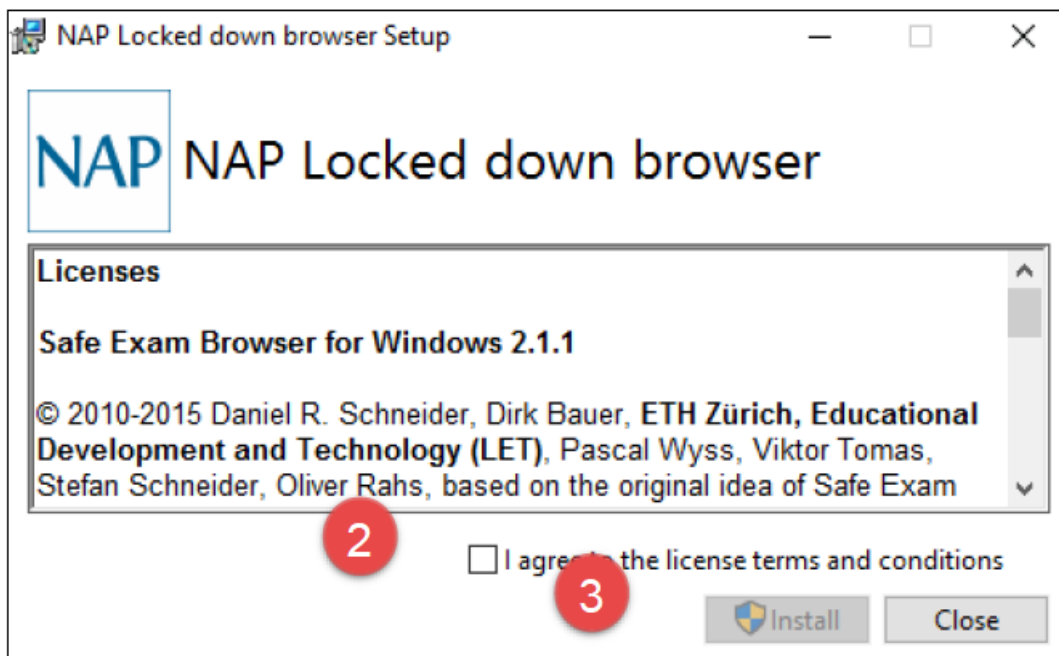

To install the .exe (microsoft)

Navigate to the locked down browser installer file (NAP Locked down browser.exe) using the operating system's file explorer. The file will be in the **Downloads** folder.

Double-click **NAP Locked down browser.exe**.

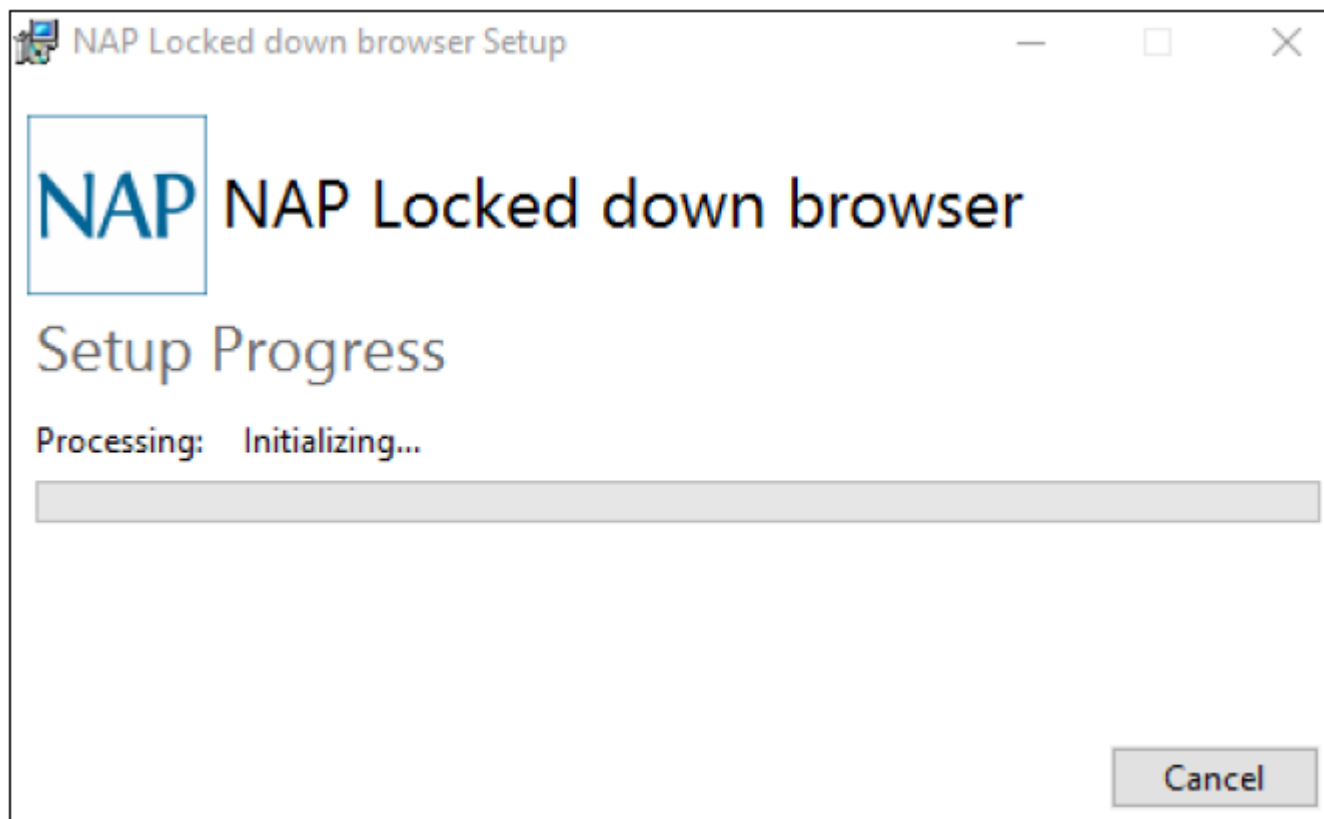

The installation wizard will launch. It will inform you that the software will be installed on the computer.

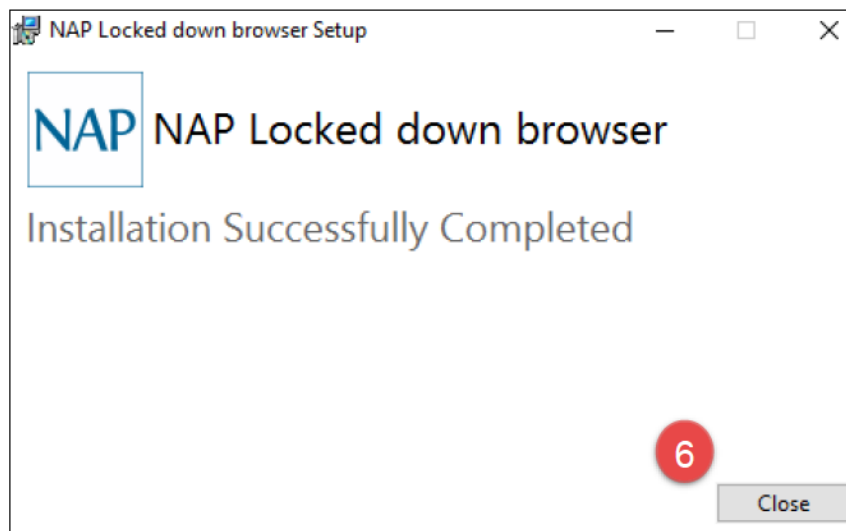

Select **I agree to licence terms and conditions**.

Select **Install**.

Depending upon your computer setup, you may be asked to confirm the install of the NAP Locked down browser. Select **Yes**.

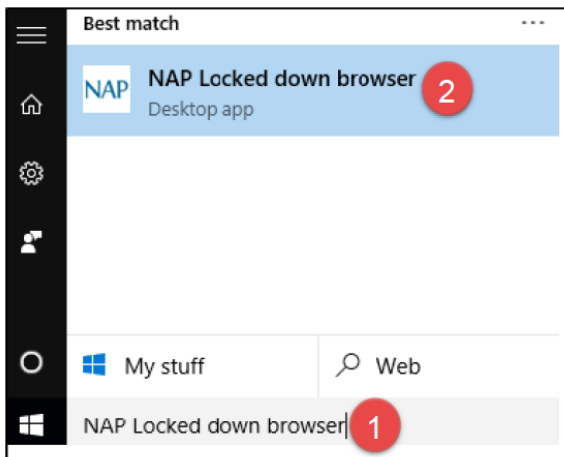

Wait for the install to occur.

Select **Close**.

To run msi. and .exe (for microsoft)

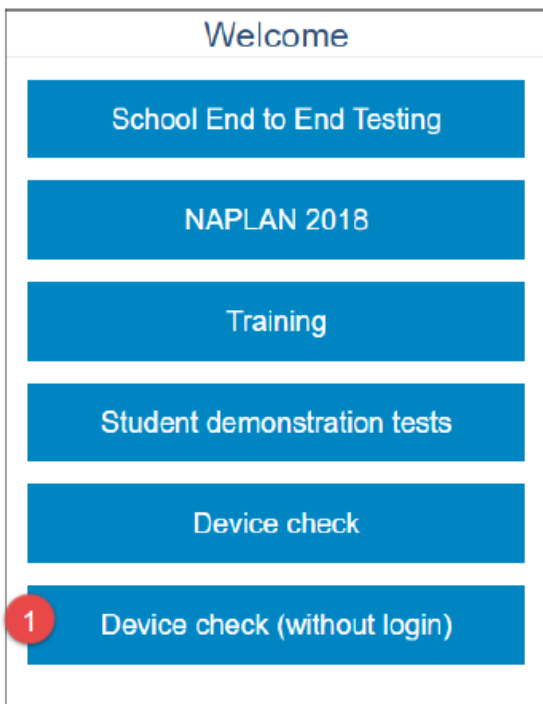

Select the Windows Start button and search for **NAP Locked down browser**.
Select **NAP Locked down browser** to launch it.
Refer to 'Run a Device Check' steps.

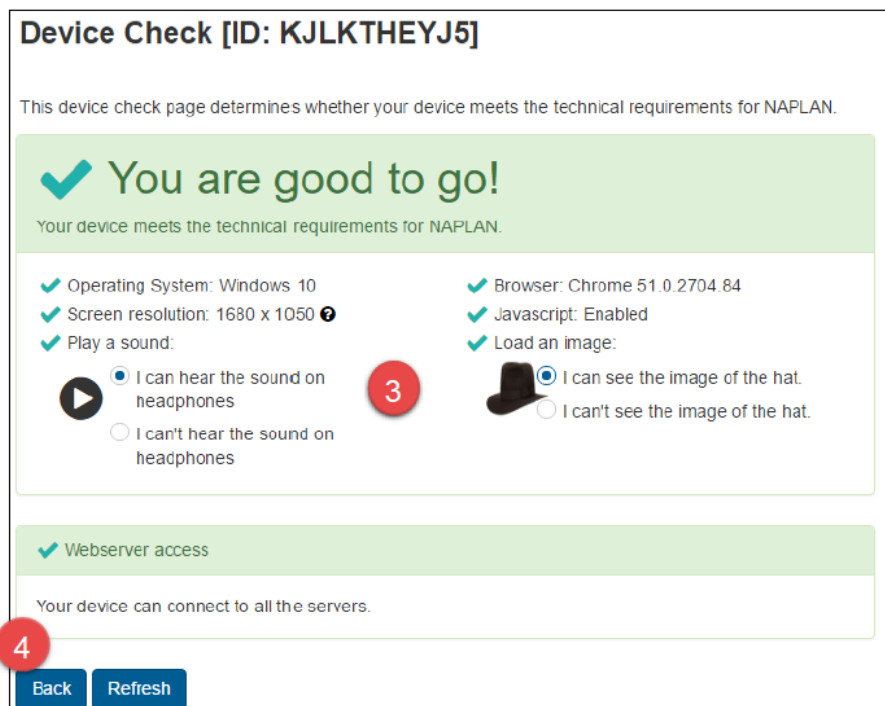

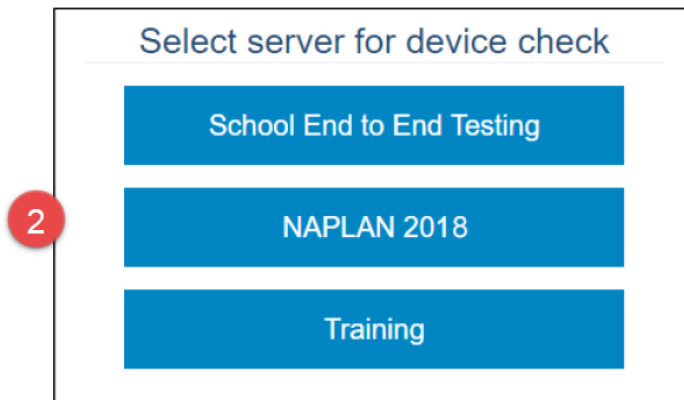

To run a device check for both msi. and .exe (for microsoft)

When you start the app you will see the Launchpad. Note: The options on the screen will change regularly. You can:

Select **Device check (without login)**.

Select the required server to perform the device check on.

Check the device. Refer to the Technical Readiness Testing user guide.

Select **Back** to return to the Launchpad.

To exit .msi. and .exe (for microsoft)

On the day of testing... or if you open it early accidentally.

You can exit the app by selecting the **×** in the bottom right on the student login screen (and other screens).

Once you are in an exam session, a Test Administrator must pause your attempt, and from the pause screen the user can log out (returning them to the student login screen where they can then exit the app using the X button at the bottom right).

If there is a connection disruption (i.e. the app cannot communicate with the server), you can exit the app from the disruption screen.

There is a keyboard shortcut for exiting the app.

1. Press Ctrl + Q.
2. Enter the quit password: QUIT!please
3. Select OK.

Proxy Setting (for microsoft)

If your network requires the use of a proxy, the following steps guide you to the place to enter the proxy details provided by your Network Administrator.

Note: These screenshots are from Windows 10 and will be different for Windows 7 or 8.

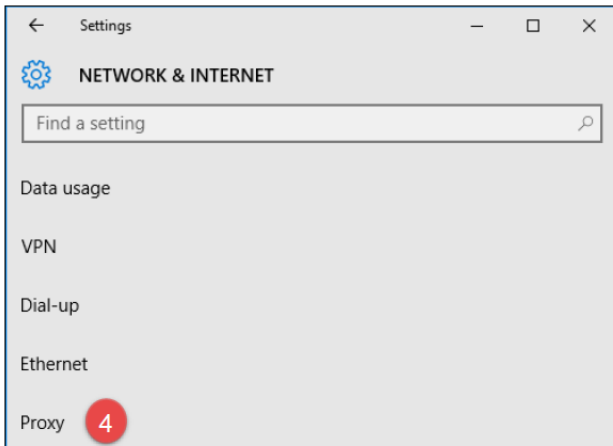

Select the **Windows** icon.

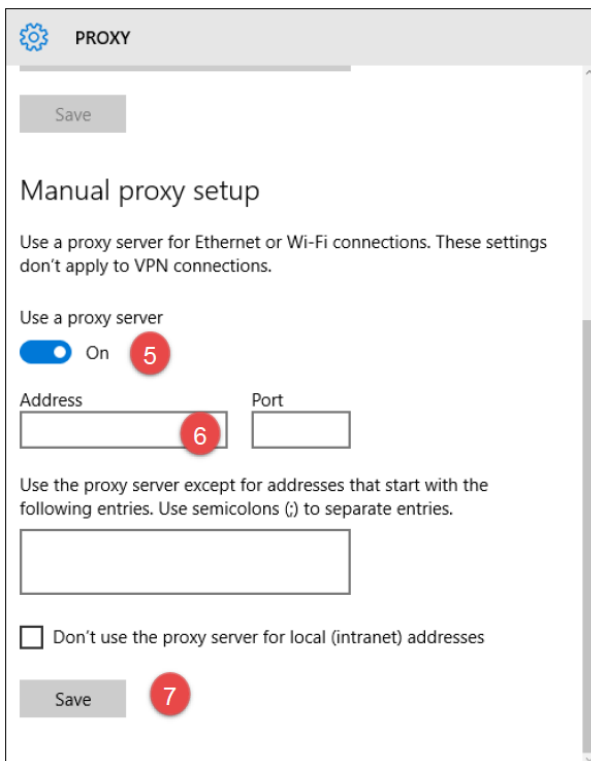

Select **Settings**.

Select **Network & Internet**.

Select **Proxy**.

Troubleshooting proxy problems (microsoft)

If you are connected to the school's network or Wi-Fi, but are not able to access the Assessment Platform, try the following steps and test again.

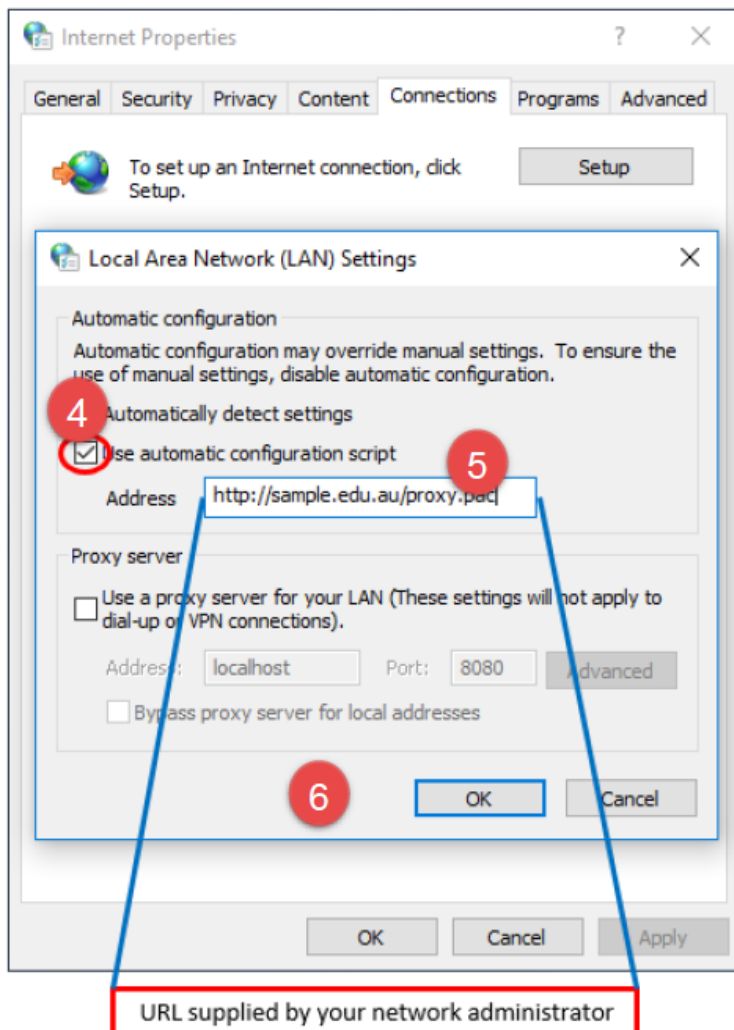

Note: These screenshots are from Windows 7 and will be different for Windows 8 or 10.

Use automatic configuration script.

Obtain the proxy automatic configuration script URL from your network administrator.

Open Internet Explorer.

Select Tools, then Internet Options, then Connections, then LAN Settings.

Select the checkbox for **Use automatic configuration script**.

Enter the proxy automatic configuration script URL in the **Address** field.

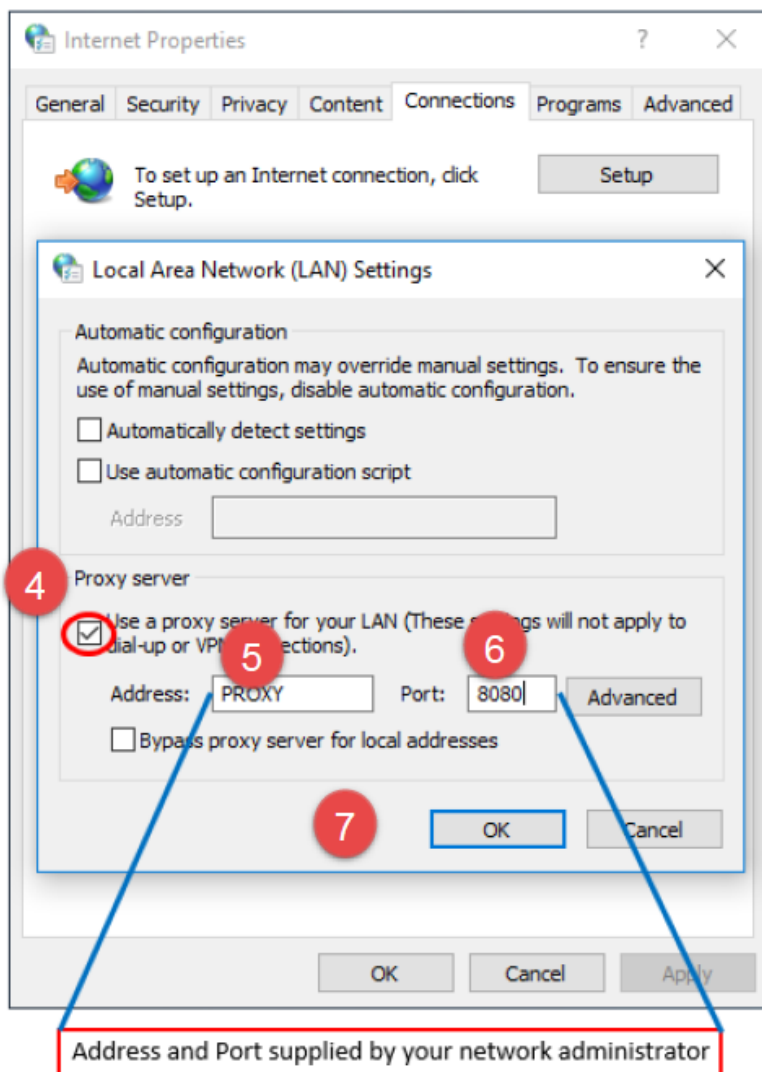

Select **OK**.

OR Manually specify a proxy server address and port

Obtain the proxy address and port from your network administrator.

Open **Internet Explorer**.

Select **Tools**, then **Internet Options**, then **Connections**, then **LAN Settings**.

Select the checkbox for **Use a proxy server for your LAN**.
Enter the proxy address in the **Address** field.
Enter the proxy port in the **Port** field.
Select **OK**.

How to Install Lockdown Browser – Mac

Click on link: <https://www.assessform.edu.au/>

Click on **Technology** and then **Locked down browser**, then scroll down the page.

The screenshot shows the NAP (National Assessment Program) website. At the top, there are logos for 'acara AUSTRALIAN CURRICULUM, ASSESSMENT AND REPORTING AUTHORITY' and 'NAP NATIONAL ASSESSMENT PROGRAM'. Below the logos is a dark blue header with the text 'Online National Assessment Platform' and links for 'About', 'FAQs', and 'Help'. A navigation bar below the header contains links for 'Home', 'NAPLAN Online', 'Technology', 'Resources', and 'Other NAP events'. The 'Technology' link is circled in red. Below the navigation bar is a 'Technology' section with a list of sub-items: 'Overview', 'Locked down browser', 'Device requirements', 'Technical Guidance and firewall requirements for schools', and 'Platform latency check'. The 'Locked down browser' item is circled in red. To the right of this list is an 'Overview' section with text describing the test window requirements and technical readiness testing (TRT).

Scroll down to locate hyperlink for the appropriate **download** button to download the NAP Locked down browser application (app) onto your device. The (.dmg) version is the simplest way to install on a single machine. The (.pkg) version is used by administrators to install the app on multiple machines over a network.

Download locked down browser and user guides

 For more information please refer to the [locked down browser user guides](#).

Choose the appropriate browser or app to install on your desktop, tablet or Chromebook device (also applies to all Bring Your Own Devices).

[Check device requirements](#) before downloading your locked down browser. 

Note: All devices need to be connected to the internet so that you can download the app and install it.

Mac

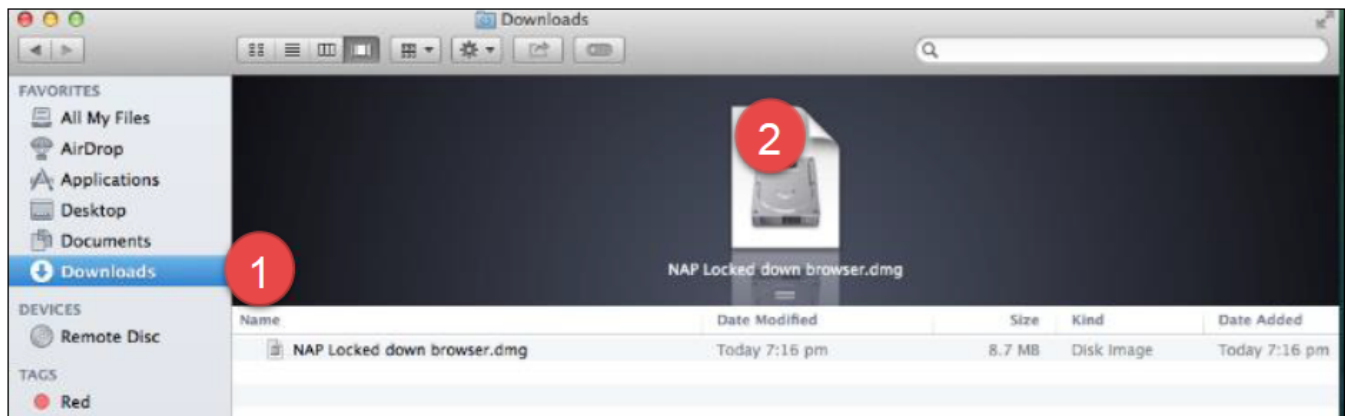

v1.4.3 (Updated: 29-Jan-2021)

UPDATE 24-Mar-2021 - Schools with Mac devices with operating systems v10.11 that are experiencing issues with launching the LDB V1.4.3 after installation will need to update their operating system to a minimum of v10.12.6. Apple's advice is that all Mac devices released from late 2009 onwards can be upgraded to 10.12.6

- [Check device requirements](#) before downloading your locked down browser.
- [download for macOS 10.12.6 or greater \(.dmg\)](#)
- [download for macOS 10.12.6 or greater \(.pkg\)](#)

Using the operating system Finder app, search for the **NAP Locked down browser.dmg** file in the **Downloads** folder.

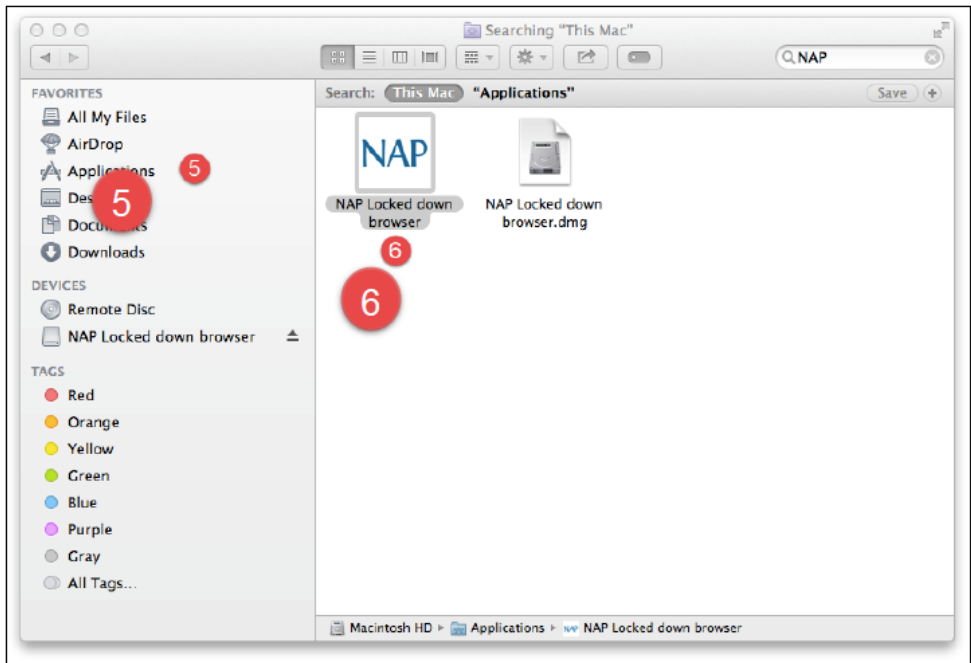

Double-click **NAP Locked down browser.dmg** to launch the installer.

Drag and drop the NAP icon into Applications folder icon.

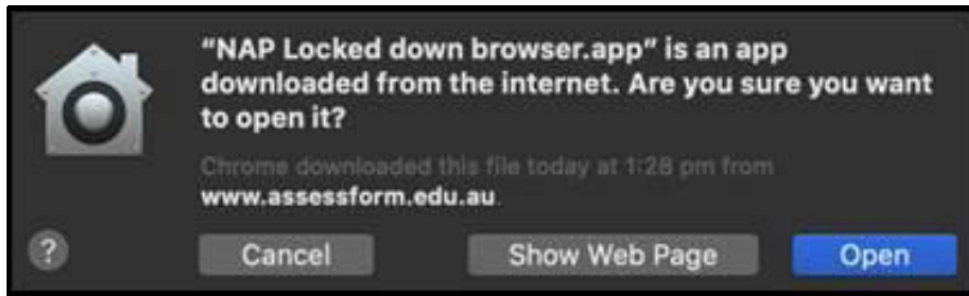

Close the installer window.

Navigate to the Applications folder and locate the **NAP Locked down browser** app.

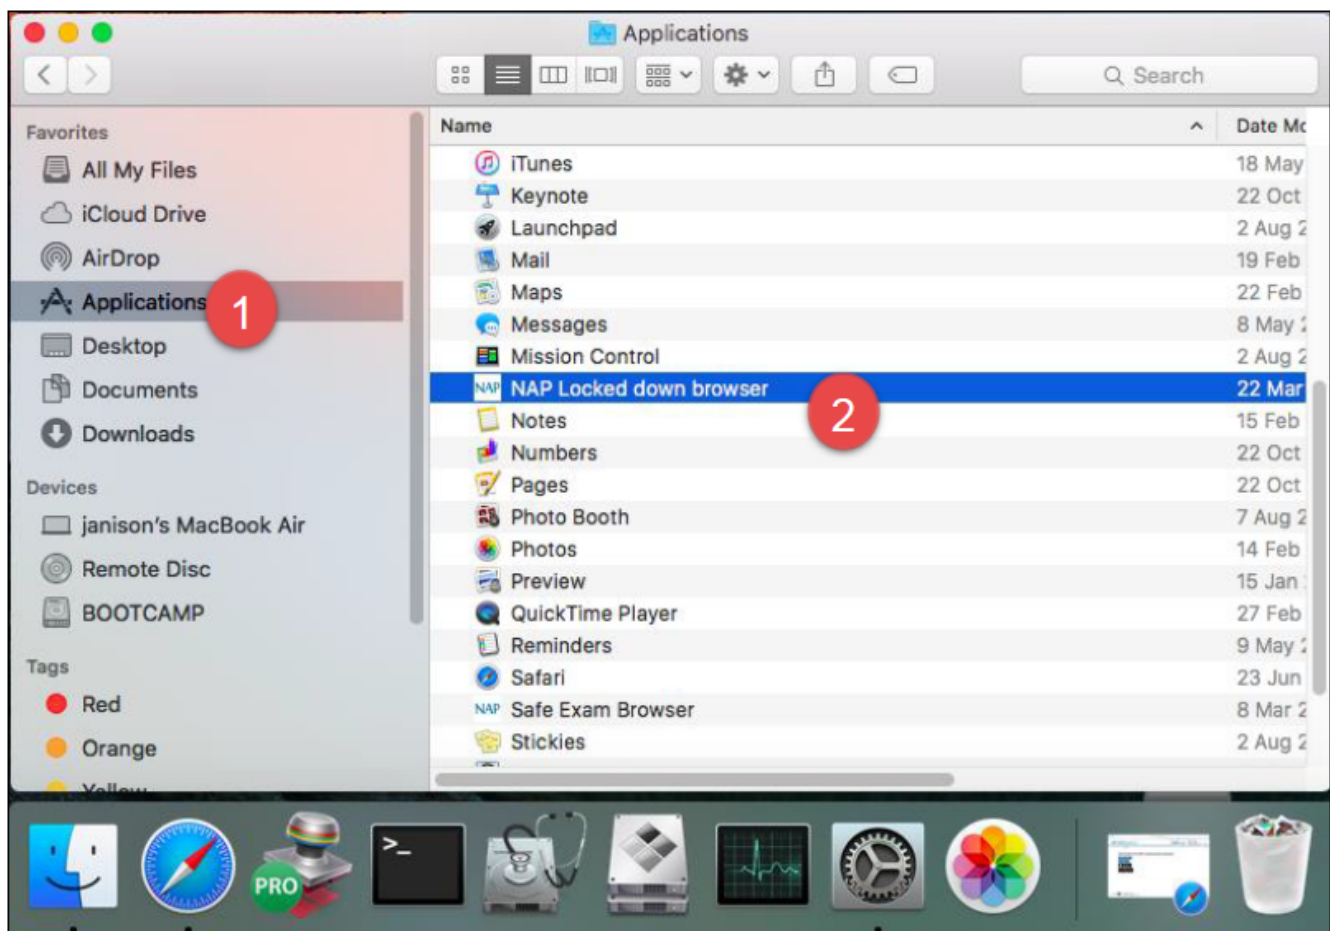

Double-click the app to launch it.

A warning message will display on the first opening of the **NAP Locked down browser app**.

Select **Open**.

To run (on mac)

Using the operating system Finder app, search for the **NAP Locked down browser** in the **Applications folder**.

Select **NAP Locked down browser**.

A warning message will display on the first opening of the **NAP Locked down browser app**.

Select **OK**.

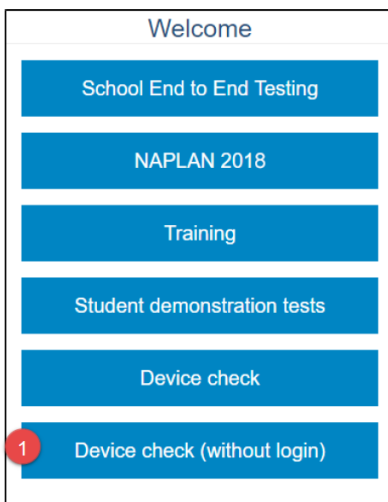

Note: Selecting 'Don't Allow' will prevent the **NAP Locked down browser app** from running without error.

Refer to 'Run a Device Check' steps.

To run a device check (for mac)

When you start the app you will see the Launchpad. Note: The options on the screen will change regularly. You can:

Run a device check (without login). Select **Device check (without login)**.

Select the required server to perform the device check on.

Select server for device check

Device Check [ID: KJLKTHEYJ5]

This device check page determines whether your device meets the technical requirements for NAPLAN.

 **You are good to go!**
Your device meets the technical requirements for NAPLAN.

 Operating System: Windows 10	 Browser: Chrome 51.0.2704.84
 Screen resolution: 1680 x 1050 	 Javascript: Enabled
 Play a sound:	 Load an image:
 <input checked="" type="radio"/> I can hear the sound on headphones	 <input checked="" type="radio"/> I can see the image of the hat.
<input type="radio"/> I can't hear the sound on headphones	<input type="radio"/> I can't see the image of the hat.

3

 Webservice access

Your device can connect to all the servers.

4

Back Refresh

Check the device.

Select **Back** to return to the Launchpad.

To exit (for mac)

You can exit the app by selecting the  in the bottom right on the student login screen (and other screens) before starting the exam.

Once you are in an exam session, a Test Administrator must pause your attempt, and from the pause screen the user can log out (returning them to the student login screen where they can then exit the app using the X button at the bottom right).

If there is a connection disruption (i.e. the app cannot communicate with the server), the student can exit the app from the disruption screen.

There is a keyboard shortcut for exiting the app.

Press Command + Q.

Enter the quit password: QUIT!please

Select OK.

Proxy Setting (for mac)

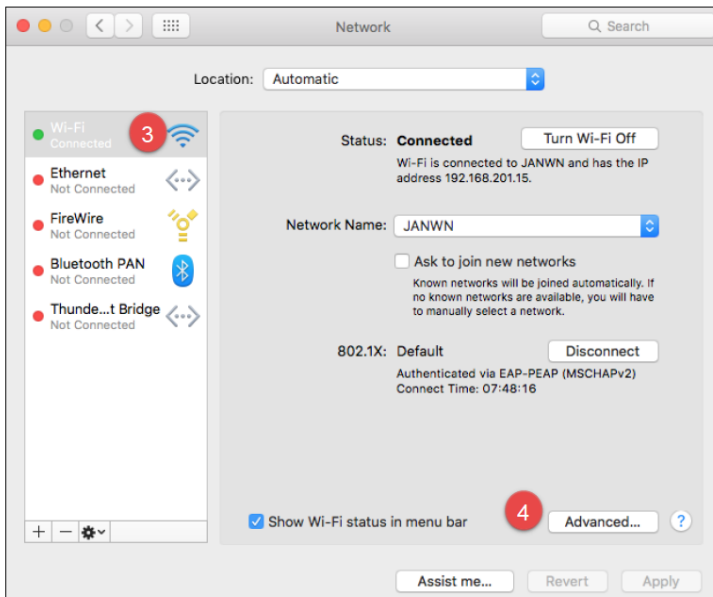

Confirm there is an internet connection before starting the NAP Locked down browser. For example, try and open a webpage in Safari.

If your network requires the use of a proxy, the following steps guide you to the place to enter the proxy details provided by your local Network Administrator.

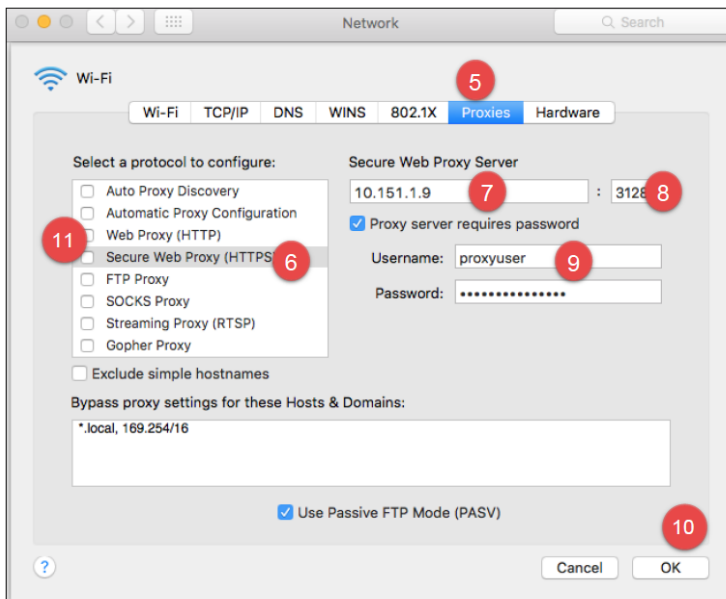

Select  in the top right corner of your screen.

Select **Open Network Preferences...**

Select your connection type.

Select **Advanced**.

Select **Proxies**.

Select **Secure Web Proxy (HTTPS)**.

Enter the network address of the server.

Enter the port.

If the proxy server requires a password:

select **Proxy server requires a password**

enter Username

enter Password.

Select **OK**.

Select **Web Proxy (HTTP)** and repeat steps 7 to 10.
