

Organic Gardening

Course description:

Learn about soils, weather patterns and biodiversity. Growing food in an organic and ethical way enhances the health of your family and community as well as helping the environment and the planet.

Course cost: Fee-free*

- This training is subsidized by the NSW Government

Course outcomes include:

- Knowledge of some different types of local soils and how to improve them
- Soil organisms and beneficial insects
- Knowledge of the local weather patterns and the types of fruits and vegetables suitable to grow in this region
- Knowledge of companion planting
- Composting
- Natural fertilisers and pest control
- Watering methods and systems to help conserve water and reduce water damage to the plants
- Community Connections
