Robotics Holiday Program

ROBOTICS ROCKS specialises in presenting interactive coding and engineering design tasks in order to provide a meaningful context for learning and understanding in mathematics, technology and science using robotics as a vehicle.

This course is presented by an expert robotics teacher and consultant, whose students have won the Victorian Robocup Competition for the last four years in a row.

Students will participate in open ended challenges using EV3's Spheros, Dash robots, Makey Makeys and coding apps.

$60 for one student, $110 for two.

Thursday 27th September
Thursday 4th October 10.00-3.00
Suitable for students from grades Prep-6

Roberts McCubbin Primary School
57 Birdwood Street, Box Hill South
Melway ref: 61 D2
