

# WHAT'S BEEN HAPPENING IN SENIOR SCHOOL?

In Content Knowledge students have begun our new topic; *The Tragedy of Julius Caesar*, by William Shakespeare. This builds on our prior knowledge over the past few years of Ancient Rome and Julius Caesar, to now reading and understanding the Shakespeare classic play! Shakespeare is usually a topic reserved for Year 7, but we are excited to introduce this ahead of time to prepare our students for their future studies!

In Text Construction, students used their high quality paragraphs from the last few weeks to publish a poster or brochure about Natural Hazards. A very timely topic, as it turns out! Students published these high quality works to pass onto Middle School students for their future Content Knowledge unit. Check out some of the fantastic work below!

As discussed last week, students have been working on multiplication. Our current focus - the area of rectangles, parallelograms and triangles, relies on a strong recall of multiplication facts. We encourage all students to continue their work at home on multiplication. This will help with our focus on calculating area.
