

Classroom Moments

Term 3 in 5H

This term, students have made positive progress with our classroom routines, with Morning Check-In providing a consistent start to the day.

Hands-on Maths activities have enhanced student engagement, while sensory activities have provided opportunities for students to explore different regulation strategies.

The Swimming Program allowed 5H students to build water safety confidence and independence.

We have also placed a strong emphasis on phonics, with opportunities to develop sound-letter knowledge through explicit and engaging activities.

Overall, 5H students have continued to build their learning confidence throughout Term 3!
