## Welcome

Our theme for the week at OSHC was environmental week. The children participated in designing our very own recycling bin, by reusing a spare box. It is important that children learn about recycling as it has many benefits for the environment. We also took a trip down to the farm to visit the animals and see the veggie patch to learn how we can grow our own food to promote a healthy lifestyle and sustainability. The children participated in crafts relating to this topic and had a great time learning and developing skills for the future.

## Holiday Program

After a successful Christmas holiday program, we are all looking forward to the Easter holiday program. Shortly we will have flyers advertising the dates and activities.

## Reminders

Please remember to have all children belongings labelled.
