

hi my name is Mia💖+

💖Water for life

All living things need WATER!

Plants:

Water is needed for living things. Water makes living things grow healthy and bigger so they can live. If seeds are too wet or dry they can die.

Humans:

Humans need water to be healthy and grow. Water protects the body temperature. Water gives humans a boost!

Animals:

Water is vital for animals to live. It makes them more powerful. Many animals like sharks have to stay in the water to survive.
