

Dates to Diarise in Term 2

- **Melbourne Careers Expo 2026 – 17 – 19 July**

Eye Specialists

Students often ask what the differences are between **Optometrists, Orthoptists** and **Ophthalmologists**.

Below is a summary of the three as posted on the [Vision Australia](#) website.

➤ **Optometrists**

Optometrists are eye care professionals who examine the eyes and visual systems to detect vision changes and diagnose eye diseases.

On an average day, an optometrist will examine eyes to diagnose eye conditions and prescribe corrective lenses.

Often, the optometrist will be a person's first point of contact before they are referred to Ophthalmologists and Orthoptists.

In Victoria, students can study optometry at -

Deakin University - [Bachelor of Vision Science/Master of Optometry](#)

University of Melbourne - [Doctor of Optometry](#)

➤ **Orthoptists**

Orthoptists are eye care professionals who work with patients to manage a broad range of eye diseases.

Orthoptists are involved in the management of eye diseases like cataracts, glaucoma, lazy eye, and macular degeneration.

Often, Orthoptists will work in clinics alongside Ophthalmologists working on assessing and managing people's eye conditions.

In Victoria, students can study orthoptics at -

La Trobe University - [Bachelor of Orthoptics \(Honours\)](#)

➤ **Ophthalmologists**

Ophthalmologists are medical doctors who have further specialised in medical and surgical eye disease.

Most commonly, ophthalmologists are involved in the assessment, diagnosis and medical treatment of eye disease.

Many eye conditions can be treated with medication, surgery, or other medical interventions, and ophthalmologists manage this.

Ophthalmologists are also highly specialised, which means individuals with complex care needs may see multiple ophthalmologists to ensure all aspects of their condition are managed appropriately.

Studying Occupational Therapy at La Trobe

Help people maximise their quality of life and reach their full potential with La Trobe's [Bachelor of Occupational Therapy \(Honours\)](#).

Discover the science behind human activity and get the know-how to conduct evidence-based occupational therapy assessments and interventions for people of all ages and backgrounds.

This 4-year course ensures students learn with a combination of face-to-face tutorials and workshops, online learning and hands-on experience, including 1,000 hours of professional placements.

By studying La Trobe's Bachelor of Occupational Therapy (Honours), students will:

- gain essential knowledge in occupational science, anatomy, physiology and psychology
- uncover the best treatment options for people with special needs and chronic conditions
- understand cultural identity and responsiveness in relation to health and wellbeing, including First Nations' perspectives
- apply their learning with individuals and families and collaborate with employers, policymakers and other health professionals
- build skills in both qualitative and quantitative research design, then pursue an applied research project or industry-based thesis in their embedded Honours year
- graduate eligible to apply for registration with the Occupational Therapy Board of Australia (OTBA).

The VCE entry requirements are Units 3 and 4: a study score of at least 30 in English (EAL) or at least 25 in English other than EAL. The ATAR for 2026 entry was 85.60 (Bundoora Campus) and 75.90 (Bendigo Campus).

Students who do not meet the abovementioned prerequisite study scores or ATAR may wish to consider the [Bachelor of Health Sciences \(Allied health major\)](#) as a possible pathway option. Students with the highest Weighted Average Mark (WAM) will be eligible to apply to transfer into the Bachelor of Occupational Therapy (Honours). Students should note that this pathway is very competitive with only 5 – 10 students successful each year.

Studying Health Sciences at Deakin

Study health sciences and help improve people's health and wellbeing. With so many careers in health sciences you'll be in demand – right now there's huge government investment in the sector, which means there's a real opportunity to make a difference. Now is your chance to become a healthcare expert and change lives for the better.

The Health Sector is Australia's fastest growing sector, and the Bachelor of Health Sciences at Deakin prepares students for a career in -

- disability services
- health education
- international aid
- sport marketing
- nutrition

The Bachelor of Health Sciences offers students 13 specialised [majors](#), and students may opt to specialise in two. On completion, students may choose to go on to further postgraduate study in a number of fields, including -

- [Master of Public Health](#)
- [Master of Health Promotion](#)
- [Master of Health Economics](#)
- [Master of Health Management](#)
- [Master of Human Nutrition](#).

Learn more by browsing [Health Sciences at Deakin](#).
