

## 2023 VET

### Structured Workplace Learning (SWL)

As part of the VCE VM and VET programs, students undertake a Structured Workplace Learning placement (SWL).

SWL compliments the VET training undertaken, it allows students the practical application of industry knowledge and increased employment opportunities.

### Finding SWL Placements

You can find SWL opportunities anywhere; local businesses, family friends and if you need more help, there is a portal for finding SWL.

The link to the portal is <https://workplacements.education.vic.gov.au/>

We have over 150 students undertaking VET as part of their VCE VM studies at Epping Secondary College, therefore finding a SWL opportunity can be difficult.

### Can you help?

Although your child may not fit into an industry that you can offer, there may be another student from Epping you can give an opportunity to learn on the job to.

Students are undertaking a variety of studies from a range of industries - Carpentry, Automotive, Plumbing, Business, IT, Beauty, Music and Horticulture!

**If you can provide a placement at your business or workplace - Please let us know**
