Bachelor of Pharmacy with Honours – Fast Track

Introducing Australia's only 3-year fast-track Pharmacy degree. Our pharmacy degree is ideal for those who like to help people, enjoy chemistry and biology, and want to step straight into a well-paying career.

The *new* fast-track [Bachelor of Pharmacy with Honours](#) adopts a trimester teaching model, allowing students to complete a traditional 4-year degree in just 3 years and get into the workplace sooner.

This course offers students a minimum of 400 hours of Professional Experience Placement (PEP) during their studies. All students will undertake placements in both community and hospital settings. Placements can be conducted in Tasmania, as well as in Australia and even internationally (travel restrictions pending). Previous students have completed their placement in Canada and the United Kingdom.

Year 12 maths and chemistry are prerequisites for this course.

Talk with Industry Webinars

In May, ACU will host a number of *Talk with Industry* webinars, and students are encouraged to participate in those that are of interest. Hear authentic stories from those who have walked the path current VCE students are considering. The ACU alumni will share real insights about their careers post-graduation, while current ACU students offer a genuine look at campus life and coursework.

Whether you're certain about your direction or just starting to explore possibilities, these conversations will provide the clarity you need.

The talks will take place from 6.00pm – 6.45pm. Registrations are essential and can be made at [Talk with Industry Series](#).

Jobs Projections to May 2035

[Jobs and Skills Australia’s \(JSA\)](#) recently published ten-year employment projections.

[JSA advises](#) that these projections show general job trends based on existing economic trends and assumptions. They are a guide to possible future directions, not exact predictions. They do not account for all future influences, including the evolving impact of new technologies like generative AI. Information about JSA’s study on AI and the workforce is available in [Our Gen AI Transition](#).

The long-term structural shift in employment growth towards services-related industries is projected to continue over the next 5 and 10 years. [Figure 1]

Figure 2

The table above [Figure 2] provides Industry - Employment Projections nationally, and a couple of factors are worth focusing on:

- Health Care and Social Assistance continues to be the largest employing industry
- Professional, Scientific and Technical Services is predicted to be the second-largest employing industry

With this in mind, it is important to note that, in recent years, most employment growth has been seen in jobs that typically require **post-secondary qualifications**. The 2025 projections suggest that this trend will continue, with more than **90% of the employment growth over the next 10 years in these occupations (skill levels 1 to 4)**.

Skill Level 1	Bachelor's degree or higher qualification
Skill Level 2	Advanced diploma or diploma
Skill Level 3	Certificate IV or III (including at least 2 years' on-the-job training)
Skill Level 4	Certificate II or III
Skill Level 5	Certificate I or secondary education
